

To Whom It May Concern,

On behalf of Local Connect, I am pleased to provide this letter of support for the Grow & Connect Association's application to PacifiCan.

Local Connect is a BC-based foodservice and distribution company focused on improving access to local food for restaurants and commercial buyers across the Interior of British Columbia. Through our work coordinating procurement, ordering, and last-mile delivery, we have experienced firsthand the logistical and coordination challenges that exist within regional food systems.

We see tremendous value in Grow & Connect's work to strengthen regional supply chain coordination and improve collaboration between producers, distributors, buyers, and logistics providers. Coordinated logistics infrastructure, shared delivery routes, and warehousing capacity are critical pieces needed to help local food systems scale sustainably.

Local Connect currently operates its own custom-built ordering platform with scheduled regional delivery routes. As our network grows, we see strong potential for integration with Grow & Connect's systems to help streamline freight coordination, reduce unnecessary direct deliveries, and better utilize existing regional transportation routes.

We are particularly excited by the opportunity for connected digital infrastructure and API integrations that allow businesses to coordinate deliveries more efficiently.

Most importantly, we believe local purchasing systems must be seamless and convenient for buyers in order to drive meaningful adoption. Grow & Connect's work directly supports this goal and represents an important step toward building stronger, more connected regional food systems across British Columbia.

Local Connect is pleased to support this application and looks forward to continued collaboration with Grow & Connect in the future.

Thank you for your consideration.

Sincerely,
Liam Milovick
Co-Founder
