Exam Preparation
Helping you Succeed

Goodluck!

1. According to the Canada Food Guide, which answer represents one serving of raw leafy vegetables?
 - (A) 2 cups
 - (B) 1 pound
 - (C) 1/2 cup
 - (D) 1 cup
2. How can you reduce the number and type of cleaning tasks you have to complete at the end of a service period?
 - (A) Train all staff in correct cleaning techniques, so equipment and work areas are cleaned correctly, reducing repetition of tasks.
 - (B) Clean and tidy your work area as you complete each task during preparation and service.
 - (C) Allocate cleaning tasks at the start of a shift amongst the team and monitor completion.
 - (D) Use the cleaning schedule to ensure everyone knows their responsibilities.
3. Which answer represents one serving of milk/alternative according to the Canada Food Guide?
 - (A) 125 ml
 - (B) there is no limit on milk/alternative
 - (C) 2 cups
 - (D) 250 ml
4. According to the Canada Food Guide, which answer represents one serving of an apple in the fruit category?
 - (A) golf ball
 - (B) light bulb
 - (C) large marble
 - (D) eraser
5. Identify which option is not part of whole wheat.
 - (A) germ
 - (B) endosperm
 - (C) shell
 - (D) bran
6. Which piece of equipment would you use to fill profiteroles?
 - (A) Rubber spatula.
 - (B) Piping bag and nozzle.
 - (C) Palette knife.
 - (D) Fluted wheel.

Cook

7. Weighing and measuring ingredients accurately is an important part of the preparation process (mise en place). Why?
- (A) If ingredients are weighed and measured accurately, you will be able to make the dish faster.
 - (B) Correctly calculating measurements increases yield and allows you to accurately portion food later.
 - (C) It will help produce cakes, pastries and breads that look and taste appropriate and yield the correct portions.
 - (D) It ensures that the dish is presented the same way every time it's made.
8. For a teenager, what is the range of fruit and vegetable servings a day suggested in the Canada Food Guide?
- (A) 7-8
 - (B) 4-6
 - (C) 2-3
 - (D) 3 vegetables and 3 fruits
9. Which answer represents one serving of meat/alternative according to the Canada Food Guide?
- (A) 500 ml legumes
 - (B) 1/2 cup chicken or lean meat
 - (C) 3 eggs
 - (D) 125 ml peanut butter
10. What are two factors that determine the quantities of ingredients required to prepare a dish?
- (A) The standard recipe and number of portions required.
 - (B) The number of portions and a list of menu items.
 - (C) The standard recipe and any dietary variations required.
 - (D) The preparation list and ingredients list.
11. Which of the following is a sign of poor quality when selecting ingredients?
- (A) Re-usable by-products that have been stored for later use.
 - (B) Products selected on a first-in, first-out basis.
 - (C) Unusual clumping or moisture in flour
 - (D) Neither of the above

Cook

12. According to the Canada Food Guide, how many slices of bread is one grain serving?
- (A) 1 (B) 4
(C) 3 (D) 2
13. What information is provided on a food preparation list?
- (A) Food production requirements and preparation deadlines. (B) Anticipated bookings for the next service period.
(C) Standard recipes with an ingredients list. (D) Requirements for preparation of daily specials and menu variations.
14. For a teenager, what is the range of milk/alternative servings a day suggested in the Canada Food Guide?
- (A) 125 ml-250 ml (B) 3-4
(C) 5-6 (D) 1-2
15. For a teenager, what is the range of meat/alternative servings a day suggested in the Canada Food Guide?
- (A) 2-3 (B) 6-7
(C) 1-4 (D) 8-9
16. The purpose of a food safety management system is to
- (A) Identify and control possible hazards (B) Identify, document, and use the correct methods for receiving food
(C) Keep all areas of the facility clean and pest free (D) Identify, tag , and repair faulty equipment within the operation
17. Diets high in cholesterol content are thought to contribute to ____ .
- (A) cataracts (B) hypertension
(C) diabetes mellitus (D) heart disease
18. When scaling a recipe down from sixteen servings to four servings, what will be the new measure for the original 1 diced medium carrot?
- (A) 1/4 carrot (B) 4 carrots
(C) 1/2 carrot (D) 2 carrots

Cook

19. To measure the temperature of equipment surface, use
- (A) Thermistor
 - (B) Infrared thermometer
 - (C) Thermocouple
 - (D) Bimetallic stemmed thermometer
20. Eggs contain all of these nutrients except
- (A) vitamin D
 - (B) vitamin C
 - (C) folate
 - (D) thiamine
21. What is the flour to liquid ratio for drop batters?
- (A) 3 parts flour to 1 part liquid
 - (B) 2 parts flour to 1 part liquid
 - (C) 2 parts flour to 2 parts liquid
 - (D) 1 part flour to 1 part liquid
22. What are three of the Big Eight food allergens?
- (A) Eggs, wheat, fish
 - (B) Coffee, raspberries, corn
 - (C) Olives, mushrooms, lettuce
 - (D) Onions, broccoli, potatoes
23. The deadliest of the bacterial food poisonings is .
- (A) botulism
 - (B) salmonellosis
 - (C) staphylococcal poisoning
 - (D) perfringens poisoning
24. The bread, cereal, rice and pasta group is a good source of
- (A) carbohydrates
 - (B) fats
 - (C) minerals
 - (D) lipids
25. Identify the definition of an emulsion.
- (A) using fresh herbs to blend a mixture together
 - (B) using salt to blend a mixture together
 - (C) a mixture of two or more liquids that are normally unmixable
 - (D) a blending method, usually by a hand held mixer

Cook

26. Cutting vegetables into long skinny strips.
- (A) Mince (B) Chop
(C) Cube (D) Julienne
27. This chef is responsible for all soups and stocks.
- (A) boucher (B) potager
(C) saucier (D) grillardin
28. WHAT TYPE OF RESTURANT PROVIDES SERVING STAFF THAT TAKES ORDERS WHILE PATRONS ARE SEATED AND THE AVERAGE PER PERSON DINNER IS \$ 10 - \$25?
- (A) FINE DINNING FULL SERVICE (B) QUICK CASUAL RESTURANTS
(C) CASUAL DINNING FULL -SERVICE (D) FAMILY DINNING FULL SERVICE
29. The best way to carry a knife in a kitchen is to hold the blade pointing
- (A) Downward and close to your side (B) Outward and close to your side
(C) Upward and to your stomach (D) Inward and above your head
30. Genetics is the only risk factor for obesity.
- (A) False (B) True
31. What safety procedures should you follow when using an electrical mixer?
- (A) Always wear protective gloves when adding food to a mixer that is switched on. (B) To minimise food contamination, rinse the attachments under water between tasks.
(C) Avoid turning the mixer on and off during your shift. (D) Do not operate near the edge of the bench in case vibration during operation causes it to fall off.
32. A food handler must wear single-use gloves when
- (A) Operating a dishwashing machine (B) Handling ready-to-eat food
(C) Working at a cash register (D) Busing tables

Cook

33. What is a mixture of egg yolks and heavy cream that adds a rich flavor and velvety smoothness to the sauce without making it too thick?
- (A) Hollandaise (B) Liaison
(C) Slurry (D) Compound butter
34. To combine thoroughly two or more ingredients.
- (A) Stir (B) Mix
(C) Combine (D) Blend
35. If you only have one cutting board, which list below identifies the best order in which to prepare the ingredients for a dish?
- (A) It doesn't matter (B) Raw poultry, onions, tomatoes
(C) Onions, tomatoes, raw poultry (D) Onions, raw poultry, tomatoes
36. Identify the term that describes the amount of servings in a recipe.
- (A) segment (B) scale
(C) yield (D) portion
37. If food-contact surfaces are in constant use, they must be cleaned and sanitized every__ hours?
- (A) 8 (B) 2
(C) 4 (D) 6
38. The cooking method that cooks food quickly, often uncovered, in very small amount of fat over high heat is?
- (A) Pan-frying (B) Stewing
(C) Simmering (D) Sautéing

Cook

39. Current measurements are more dangerous to make with a multimeter than voltage measurements because:
- (A) Most multimeters are unfused
 - (B) The circuit must be broken (opened)
 - (C) The resulting magnetic fields may be very strong
 - (D) A fuse protects the voltage measurement ranges, but not current
 - (E) You must use both hands to take the measurement
40. Fruits that have a central pit enclosing a single seed are known as
- (A) Drupes
 - (B) Summer fruits
 - (C) Tropical fruits
 - (D) Winter fruits
41. Once they have been peeled, sliced or cut, fruits and vegetables should be refrigerated.
- (A) False
 - (B) True
42. When scaling a recipe up from three servings to ten servings, what will be the new measure for the original 4 ounces (118 ml) of chicken stock?
- (A) 3.3 ounces (97 ml)
 - (B) 13.3 ounces (393 ml)
 - (C) 6 ounces (177 ml)
 - (D) 12 ounces (354 ml)
43. Measure $\frac{1}{4}$ cup corn with a:
- (A) measuring spoon
 - (B) dry measuring cup
 - (C) liquid measuring cup
44. The three main groups of carbohydrates are _____.
- (A) glucose, fructose, and galactose
 - (B) monosaccharides, disaccharides, and polysaccharides
 - (C) sucrose, cellulose, and glycogen
 - (D) fats, proteins, and minerals
45. If you are cooking fried chicken in the kitchen and the frying pan catches on fire, how should you put it out?
- (A) pick the pan up and carry it outside
 - (B) smother it with baking soda
 - (C) throw water on it
 - (D) use a Class A fire extinguisher

Cook

46. What is the most immediate way to gather customer feedback?
- (A) Mailing surveys (B) Distributing comment cards
(C) Holding focus groups (D) Talking to diners
47. To cook uncovered in a small amount of fat in a pan.
- (A) Simmer (B) Toast
(C) Saute (D) Steep
48. What would you use to measure 3 tablespoons of cooking oil.
- (A) liquid measuring cup (B) measuring cups
(C) Measuring spoons
49. Identify the thickening agent used in Veloute Sauce.
- (A) roux though sometimes a liaison (B) emulsification
(C) brown stock (D) cornstarch though sometimes arrowroot
50. Identify the term that describes the amount of servings in a recipe.
- (A) yield (B) scale
(C) segment (D) portion
51. What is another name for blood sugar?
- (A) sucrose (B) glucose
(C) lactose (D) fructose
52. When should a shipment of fresh chicken be rejected?
- (A) when the shellstock identification tags are not attached to the container (B) when the flesh of the chicken is firm and springs back when touched
(C) when the flesh of the chicken appears moist (D) when the receiving temperature is 50 degrees F

Cook

53. What type of heat detector uses infrared and ultra violet sensors that respond to the movement of flame or to its radiant energy?
- (A) Flame detector (B) Rate of rise detector
(C) Thermostat detector (D) Ionization detector
54. Which piece of jewelry can be worn on a food handler's hand or arm?
- (A) Diamond ring (B) Which piece of jewelry can be worn on a food handler's hand or arm?
(C) Medical bracelet (D) Plain band ring
55. Which of the following is not a core food group?
- (A) fruits (B) meats
(C) carbohydrates (D) grains
56. Lactose is milk sugar.
- (A) False (B) True
57. to cooking gently in liquid just below the boiling point
- (A) simmer (B) mince
(C) skewer (D) sift
58. Identify the moist heat cooking method?
- (A) stew (B) steam
(C) deep fry (D) stir fry
59. Identify how to best ensure that leftovers will be eaten.
- (A) label leftovers with date and content in airtight containers for fridge or freezer (B) make leftover soup every few days
(C) freeze all leftovers immediately (D) learn to blend leftovers into smoothies

Cook

60. A large utility knife that is most often used by a cook is also called a
- (A) butcher knife (B) swiss knife
(C) paring knife (D) chef or French knife
61. What type of vegetables form is rich in sugars, starches, vitamins and minerals and exists both above and below ground
- (A) Stem (B) Roots
(C) Tuber (D) Flower
62. What is a safety advantage to wearing an apron?
- (A) your coat won't get as dirty (B) it won't catch on fire
(C) provides an extra layer of protection (D) knives cannot cut through them
63. Cut into evenly shaped square pieces about 1/2 inch on each side.
- (A) Ball (B) Chop
(C) Mince (D) Cube
64. A recipe provides instructions on how to make something as well as what is needed to make it.
- (A) True (B) False
65. What should be done after cake batter is poured into baking containers and before they are placed in the oven?
- (A) create a mound in the centre of the batter (B) tap the pans on the counter to remove air bubbles from the batter
(C) let rest at least 15 minutes (D) lightly dust the top of the batter with flour
66. In which food can you NOT find the mineral calcium?
- (A) egg (B) onion
(C) cheese (D) milk

Cook

67. The fixed acids in wine are:

- (A) acetic acid and ethyl acetate
- (B) lactic, fumaric, propionic, butyric
- (C) malic, tartaric, citric
- (D) All

68. Generalizations that individuals make about particular groups that assume all members are the same are called?

- (A) Prejudices
- (B) Stereotypes
- (C) Principles
- (D) Diversity

69. Is it OK to wear nail polish when handling food?

- (A) Yes
- (B) No

70. Cooking a custard correctly ensures that eggs don't curdle, define curdle.

- (A) evaporate
- (B) liquify
- (C) congeal, coagulate
- (D) sour

71. This type of small hybrid poultry is typically four to six weeks old, plump-breasted and sold whole weighing up to two and a half pounds.

- (A) Cornish game hen
- (B) fowl
- (C) capon
- (D) turkey

72. Which of the following are acceptable ways of extinguishing a fire?

- (A) Deny it oxygen.
- (B) all
- (C) Remove the fire's fuel supply.
- (D) Disrupt the flame's chain reaction by using a dry chemical extinguisher.

73. Birds that have the capability to fly long distances will typically have white breast meat.

- (A) False
- (B) True

74. What are foods like milk, cheese, and yogurt called?

- (A) dairy
- (B) grains
- (C) proteins

Cook

75. What item is considered acceptable work attire for a food handler?
- (A) nail polish (B) antimicrobial plastic watch band
(C) false eyelashes (D) plain-band ring
76. A Full Safety Harness is required while working on a ladder which is 6 Meter high.
- (A) True
(B) False
77. Diamond shaped signs indicate:
- (A) warning signs (B) railroad crossings
(C) safety hazards (D) stop signs
78. Yeast is a multi-celled microorganism.
- (A) False (B) True
79. Which tool is safe to use when stirring hot liquids in a pot or pan on the stove top?
- (A) rubber spatula (B) metal whisk
(C) wooden spoon (D) metal serving spoon
80. The ratio of liquid to flavoring ingredients in vegetables stock is?
- (A) 11lbs of vegetables to 5 qts of water to yield 1 gal of stock (B) 1lb of vegetables to 1qt of water to yield 1qt of stock
(C) 2lbs of vegetables to 4qts of water yield 1 qt (D) 8lbs of vegetables to 6 qts of water to yield 1 gal of stock
81. Fractions can be added once they have a ?
- (A) Dividend (B) Decimal
(C) Common numerator (D) Common denominator
82. The edible portion is the amount of a food product before it has been trimmed and cut for use in a recipe.
- (A) False (B) True

Cook

83. Seeds from pod-producing plants are?

- (A) Pilaf
- (B) Beans
- (C) Legumes
- (D) Grains

84. Some researchers believe that ----- can impair your written communication skills?

- (A) Texting
- (B) Emailing
- (C) Typing
- (D) Audio taping

85. To cook in hot fat or oil.

- (A) Fry
- (B) Broil
- (C) Grill
- (D) Boil

86. Which of these is a TCS food?

- (A) Uncooked rice
- (B) Baked bread
- (C) Baked potato
- (D) Dry crackers

87. To cook in liquid over low heat, keeping liquid boiling.

- (A) Melt
- (B) Saute
- (C) Simmer
- (D) Broil

88. Which could lead to cross contact during shipping?

- (A) ketchup bottles stacked on top of mustard bottles
- (B) crushed cartons of eggs on top of pasta boxes
- (C) opened boxes of rice spilling onto boxes of oats
- (D) cans of tomatoes stacked next to cans of green beans

89. To spread a liquid coating on a food, using a pastry brush or paper towel.

- (A) grease
- (B) brush
- (C) bread
- (D) flute

Cook

90. Eating too many saturated fats increases your chance of developing
- (A) scurvy
 - (B) hepatitis
 - (C) heart disease
91. A waiter or waitress cooks the food in a restaurant.
- (A) True
 - (B) False
92. What workers' rights are included in federal and provincial legislation
- (A) the right to know, the right to rehabilitation, and the right to refuse unsafe work
 - (B) the right to participate, the right to rehabilitation, and the right to refuse unsafe work
 - (C) the right to know, the right to participate, and the right to refuse unsafe work
 - (D) the right to know, the right to be compensated for injury, and the right to refuse unsafe work
93. Which measuring equipment do you need to measure $\frac{3}{4}$ teaspoon oil?
- (A) 1 teaspoon
 - (B) $\frac{1}{4}$ teaspoon
 - (C) $\frac{1}{3}$ teaspoon
 - (D) $\frac{1}{4}$ and $\frac{1}{3}$ teaspoon
94. If a fire starts in a pan on the stove, you can smother it by covering it with a paper towel.
- (A) True
 - (B) False
95. What food is associated with protein?
- (A) orange
 - (B) celery
 - (C) fish
96. Which of the following is the purpose of CPR?
- (A) Dislodge blood clots within the victim's lungs
 - (B) Maintain oxygenated blood circulation
 - (C) Build upper body strength
 - (D) Stabilize body temperature to avoid hypothermia

Cook

97. Blanch

- (A) To cook in liquid at boiling temperature
- (B) To cook slowly in liquid over low heat
- (C) To pour boiling water over, or to dip into boiling water, to loosen skin or set color. Also used to prepare food for canning, freezing, or drying

98. to cook in hot fat

- (A) chop
- (B) fry
- (C) core
- (D) mix

99. Liquids

- (A) hydrate the protein and starch in flour; helps form gluten
- (B) serves as a tenderizing agent in baked products
- (C) help to incorporate air into a baked product
- (D) give structure to a quick bread

100. In French cooking, what is Lardon?

- (A) pad of fat used as a seasoning ingredient
- (B) reduced stock liquid
- (C) congealed stock reduction
- (D) seasoned clarified butter

101. Which of the following foods contains a Big Eight allergen

- (A) Pickles
- (B) Pecan pie
- (C) Sliced deli meat

102. What is a class "C" fire?

- (A) gasoline
- (B) ordinary combustions like wood, paper, etc
- (C) combustible metals such as magnesium and sodium
- (D) electrical equipment, motors, switches

Cook

103. WHMIS contains class and division hazard symbols for different types of hazards. What hazard is represented by a circle containing a skull and crossbones
- (A) Class C (B) Class E
(C) Class F (D) Class D
104. In quick breads, what is the leavening agent?
- (A) baking soda (B) both baking powder and baking soda
(C) baking powder (D) yeast
105. Identify the correct percentage of how much faster an induction cooktop heats up compared to a radiant cooktop.
- (A) 25-50 percent (B) 5-10 percent
(C) 10-30 percent (D) 50-70 percent
106. To cut into small squares.
- (A) Cube (B) Mince
(C) Dice (D) Julienne
107. This type of knife easily cuts cakes and breads.
- (A) utility (B) paring
(C) serrated (D) slicing
108. BOULANGER AFFECTED THE GROWTH OF THE FOOD SERVICE INDUSTRY BY
- (A) DEVELOPING PASTEURIZATION (B) OPENING THE FIRST RESTURANT
(C) OPENING THE FIRST CAFÉ (D) INVENTING THE COOKING GUILDS
109. Potatoes exposed to light may develop a greenish color because they contain?
- (A) Chlorine (B) Solanine
(C) Fiber (D) Starch

Cook

110. A flatbread containing corn meal, Colombian cheese and ricotta cheese is?
- (A) none (B) Arepa
(C) Pandebono (D) all
111. To cut by putting food through a food chopper or grinder.
- (A) Mince (B) Score
(C) Pare (D) Grind
112. An event in which property damage or injury is narrowly avoided is a(n)
- (A) Accident (B) Liability
(C) Hazard (D) Near miss
113. Although knives are primarily for cutting, it is acceptable to use them to pry open containers and difficult lids.
- (A) True (B) False
114. The leaves, stem, or flowers of an aromatic plant are ?
- (A) Seasonings (B) Herbs
(C) Flavors (D) Spices
115. Roasting bones to enhance the flavor and color of stock is a process known as?
- (A) Par-boiling (B) Browning
(C) Sweating (D) Blanching
116. What's the best way to thaw a frozen turkey?
- (A) In a sink full of water (B) On a prep table
(C) In a walk-in cooler
117. What's the best way to cool containers of chili?
- (A) In an ice-water bath (B) In the cooler
(C) On a prep table

Cook

118. Carry knives properly. Hold the knife beside you, point down, with the sharp edge back and away from you. Don't swing your arm. Whenever possible , carry knives in a sheath. Warn people when you are walking past them with a knife in hand.
- (A) True (B) False
119. Fruits that are cooked in simmering water are
- (A) Broiled (B) Sautéed
(C) Poached (D) Roasted
120. Women's calorie requirements as compared with men's are generally
- (A) lower (B) the same
(C) half (D) higher
121. When using a fire extinguisher to extinguish a fire, it should be?
- (A) pointed at the top of the flames (B) pointed at the base of the fire
(C) moved up and down to cool the flame (D) held within 6 inches of the flame
122. _____ is the most common preventative antimicrobial and treatment for oxidation in the vineyard and winery.
- (A) Sulfur (B) Ultraviolet light
(C) Ozone (D) Steam
123. The type of poultry has tender young meat and is typically eight to nine weeks old and weighs four pounds and over. It is suitable for any cooking method.
- (A) capon (B) duck
(C) roaster (D) fowl
124. The variation of a language spoken by a particular group of people is called?
- (A) Dialect (B) Jargon
(C) Accent (D) Semantics

Cook

125. To cut into very small cubes.

- (A) Mash
- (B) Score
- (C) Cube
- (D) Dice

126. This is a good strategy for achieving and maintaining a healthy weight.

- (A) follow a fad diet
- (B) skip meals
- (C) eat only one type of food
- (D) keep track of the food you eat

127. Identify the largest fraction.

- (A) $\frac{3}{4}$
- (B) $\frac{3}{8}$
- (C) $\frac{1}{3}$
- (D) $\frac{1}{2}$

128. To cook over steam rising from boiling water.

- (A) Steep
- (B) Steam
- (C) Simmer
- (D) Stew

129. Failure to meet the body's nutrient needs may result in a deficiency disease.

- (A) True
- (B) False

130. What does FIFO stand for?

- (A) Food-In, Food-Out
- (B) First-In, First-Out

131. Identify the proper procedure for cleaning crumbs from a counter.

- (A) scrub surface with bleach and let air dry
- (B) dry wipe with paper towel or dry cloth, wash, rinse and sanitize
- (C) wipe surface down with soapy wet towel, dry with paper towel and sanitize

132. If you order an egg white omelette for breakfast, you will be eating what part of the egg?

- (A) chalaza
- (B) germinal disc
- (C) albumen
- (D) yolk

Cook

133. When employee learns the functions of another job within the operation is it known as?
- (A) Cross-training (B) On-the-job training
(C) Group-training
134. What is the meaning of the French term "mis en place"?
- (A) To listen carefully (B) To place on a dish or plate
(C) To work smart (D) To put in place
135. If a knife is falling off a counter, you should
- (A) knock it away. (B) quickly catch it.
(C) yell, "Knife!" (D) let it fall.
136. Which description identifies the ideal appearance of a standard butter cake?
- (A) flat top with cracks, high volume and thin crust (B) flat top without cracks, high volume and thin crust
(C) rounded top without cracks, high volume and thin crust (D) rounded top with deep cracks, high volume and thin crust
137. Generalizations that individuals make about particular groups that assume all members are the same are called?
- (A) Principles (B) Stereotypes
(C) Prejudices (D) Diversity
138. Avoid placing hot food from the oven on this surface.
- (A) on a cooling rack (B) on a wooden board
(C) on the countertop (D) on the stove top (if it is not turned on)
139. What can be added to fruit before freezing that will slow enzymatic browning?
- (A) ascorbic acid (B) salt
(C) sugar (D) sodium bicarbonate

Cook

140. Identify the proper sequence for cleaning food contact surfaces.
- (A) wash, rinse, sanitize (B) wash, sanitize, dry with a clean dry cloth
- (C) clean thoroughly with soap and water and air dry (D) clean surface of all dirt and debris
141. to place in the refrigerator until cold
- (A) chill (B) roll
- (C) cool (D) boil
142. Sugar adds sweetness to muffins. Identify what other function sugar has in muffins.
- (A) tenderizes (B) adds volume when creamed with fat
- (C) contributes to browning (D) all of the above
143. What is the ratio of butter to flour in a roux?
- (A) 1:2 (B) 2:1
- (C) 1/2:1 (D) 1:1
144. "Source of Energy" is which of the following characteristics?
- (A) pneumatic (B) all of the above
- (C) hydraulic (D) electrical
145. Identify the three ingredients used to set yeast.
- (A) warm water, salt, yeast (B) warm milk, yeast, oil
- (C) warm water, yeast and a small amount of sugar/sweetener (D) eggs, flour and a small amount of sugar/sweetener
146. Appetite is a feeling of physical discomfort that is caused by your body's need for nutrients.
- (A) False (B) True

Cook

147. WHMIS has aligned with the worldwide hazard communication system known as GHS - the Globally Harmonized System of Classification and Labeling of Chemicals?

- ☐ (A) True
- ☐ (B) False

148. What does it mean if an ingredient is "divided" in a recipe?

- ☐ (A) you will be using both halves at different stages of preparation
- ☐ (B) choice to use half the ingredient if you're scaling the recipe
- ☐ (C) choice to use half the ingredient because it's expensive
- ☐ (D) choice to use half the ingredient because it's unhealthy

149. Which chopping board should be used for dairy products?

- ☐ (A) Blue
- ☐ (B) Red
- ☐ (C) White
- ☐ (D) Yellow

150. It is important to cook food to high enough temperature so that

- ☐ (A) Pathogens are reduced and illness is prevented
- ☐ (B) The possibility of cross-contamination is greatly reduced
- ☐ (C) Allergens are reduced to nontoxic levels
- ☐ (D) Food looks fully cooked when served to a guest

151. After handling raw meat, you need only to rinse your hands with hot water.

- ☐ (A) False
- ☐ (B) True

152. Béchamel, veloute, and hollandaise are called?

- ☐ (A) Derivative sauces
- ☐ (B) Thickeners
- ☐ (C) Grand sauces
- ☐ (D) Compound butters

153. Any cuts, falls, burns or any other type of injury should be reported.

- ☐ (A) True
- ☐ (B) False

154. A CHOKING PERSON CAN BE HELPED BY THE USE OF?

- ☐ (A) CPR
- ☐ (B) THE HEMLICH MANEUVER
- ☐ (C) DEFIBRATION
- ☐ (D) FIRST AID

Cook

155. Arc blast is caused by:

- (A) Discharge of high electrical current through open air
- (B) Radio frequency emissions from high-power transmitters
- (C) Poor contact within electrical wire splices
- (D) Failure to lock-out and tag-out electrical breakers
- (E) Ionization of gases near high-voltage electrical conductors

156. The transfer of heat from one item to another when the items come into direct contact with each other is?

- (A) Conduction
- (B) Radiation
- (C) Convection
- (D) Sous vide

157. You can get food poisoning from raw meat and unwashed fruit and vegetables

- (A) True
- (B) False

158. What does HACCP stand for?

- (A) Hazard Analysis Critical Carrots Pineapple
- (B) All
- (C) Hazard Avoid Cutting Control Point
- (D) Hazard Analysis Critical Control Point

159. What is the minimum time an iodine sanitizer solution must be in contact with the object being sanitized?

- (A) 60 seconds
- (B) 30 seconds
- (C) 45 seconds
- (D) 15 seconds

160. To rub a vegetable, such as a carrot, with the sharp edge of a knife in order to remove only the outer layer of skin.

- (A) Sliver
- (B) Score
- (C) Grind
- (D) Scrape

Cook

161. The process that removes lumps from a dry, powered ingredient and gives it a smoother consistency is called?

- (A) Flattening
- (B) Sifting
- (C) Blending
- (D) Mixing

162. Braise

- (A) To fry quickly in a small amount of fat
- (B) To precook by boiling until partially done
- (C) To brown in a small amount of hot fat, then add a small amount of liquid and cook slowly in a covered pan on the stovetop or in the oven

163. To cover a food with a coating of crumbs made from bread, crackers, or cereal. The food is often dipped in a liquid such as milk or egg before coating.

- (A) Bread
- (B) Dredge
- (C) Flute
- (D) Brush

164. According to the Canada Food Guide, a serving of cheese is represented by how many dice?

- (A) 2
- (B) 1
- (C) 7
- (D) 3

165. Slurry, a liaison, and a roux are all considered to be?

- (A) Soups
- (B) Thickeners
- (C) Aromatics
- (D) Stocks

166. The measurement of an item's resistance to gravity is called?

- (A) Yield
- (B) Length
- (C) Volume
- (D) Weight

Cook

167. to cook in a small amount of hot fat

- (A) bake or roast
- (B) marinate
- (C) pan-fry or saute
- (D) pare or peel

168. For servers, Wearing-----will help to create a positive first impression.

- (A) A clean, ironed uniform
- (B) A hat or head-covering for sanitary purpose
- (C) Brightly polished jewelry
- (D) Expensive, strong perfume

169. A tool that can be used to cut shortening into flour is a .

- (A) cutting board.
- (B) rolling pin.
- (C) wire whisk.
- (D) pastry blender.

170. To form a standing edge on pastry, such as a pie crust before baking. Press the dough with your fingers to create this scalloped edge, or use a fork to "crimp" the edge.

- (A) Marinate
- (B) Dredge
- (C) Flute
- (D) Grease

171. To put dry ingredients through a sifter or a fine sieve to incorporate air.

- (A) Dredge
- (B) Sift
- (C) Flute
- (D) Brush

172. This part of the egg keeps the yolk securely suspended inside the egg.

- (A) air cell
- (B) chalaza
- (C) albumen
- (D) vitelline membrane

173. The techniques for cooking grains in which the grain is sautéed briefly in oil or butter is called?

- (A) Arborio
- (B) Risotto
- (C) Pilaf
- (D) Lyonnaise

Cook

174. These are foods that frequently cause an allergic reaction.
- (A) milk, eggs, and wheat (B) rice and pears
(C) lamb, rice, and sugar (D) chocolate and strawberries
175. Inadequate cooking (undercooking food) is the leading cause of cross contamination.
- (A) False (B) True
176. Identify the sauce made from poultry or meat drippings, thickening agent and a liquid.
- (A) vinaigrette (B) chutney
(C) gravy (D) coulis
177. Which class of fire extinguisher should an employee use to put out an electrical fire?
- (A) a (B) b
(C) abc (D) c
178. Beat
- (A) none (B) To add new ingredients to a fluffy mixture by cutting down through the mixture with a utensil; going across the bottom of the bowl; then up and over, close to the surface
(C) To make a mixture smooth, or to add air by using a brisk whipping or stirring motion with a utensil or electric mixer (D) To combine ingredients, usually by stirring
179. Thawing food at room temperature could lead to
- (A) Poor personal hygiene (B) Physical contamination
(C) Cross-contamination (D) Time temperature abuse
180. Water should be used to put out any type of fire in the kitchen.
- (A) True (B) False

Cook

181. to heat an oven to desired temp before putting in food
- (A) preheat
 - (B) bread
 - (C) steam
 - (D) cream
182. Which is a TCS food?
- (A) saltines
 - (B) baked potato
 - (C) coffee
 - (D) banana
183. Marinate
- (A) To cook in hot liquid, being careful that food holds its shape
 - (B) To allow a food to stand in a seasoned liquid to soften or to add flavor
 - (C) To extract color, flavor, or other qualities from a substance by leaving it in water just below the boiling point
184. If a diet does not supply enough fats and carbohydrates, the body will use proteins for energy before using them to support growth and maintenance.
- (A) True
 - (B) False
185. Carbohydrates, fats, and proteins supply the body with energy.
- (A) True
 - (B) False
186. To determine how much of an item is needed to yield an AP amount?
- (A) Divide the yield percentage by the edible portion amount
 - (B) Add the yield percentage to the edible portion amount
 - (C) Multiply the edible portion amount needed by the yield percentage
 - (D) Divide the edible portion amount needed by the yield percentage
187. to combine 2 or more ingredients
- (A) mix
 - (B) stir
 - (C) mince
 - (D) boil

Cook

188. When a guest has an allergic reaction and 911 is called, what should the employee be prepared to tell the operator?
- (A) whether or not the guest has health insurance (B) the name, age, and address of the guest
- (C) how frequently the guest has allergic reactions (D) whether or not the guest gave him or herself an injection of epinephrine
189. For which cutting tool do you use a sawing motion?
- (A) peeler (B) serrated knife
- (C) boning knife (D) chef knife
190. This type of poultry is usually not sold at a typical grocery store. It has dark and tender meat with a minimal amount of fat and is suitable for roasting, broiling, or sauteing.
- (A) fowl (B) duck
- (C) pigeon (D) turkey
191. Thawing food at room temperature could lead to
- (A) Cross-contamination (B) Time temperature abuse
- (C) Physical contamination (D) Poor personal hygiene
192. How can a food handler prevent cross-contamination when prepping raw meat and ready-to-eat food?
- (A) Prepare them at the same time on the same prep table (B) Clean and sanitize the work surfaces between each product
- (C) Wear gloves when handling the meat, but not the ready-to-eat food (D) Hold both products at the correct temperature
193. If I want to stay healthy, can I still eat french fries?
- (A) yes, just not every day (B) no
- (C) no, though sweet potato fries are ok
194. A Class A fire extinguisher is used for what type of flammable material(s)?
- (A) electrical outlets and equipment (B) liquids and grease
- (C) wood, paper, cloth, and cardboard (D) carbon dioxide

Cook

195. When is it acceptable to eat in an operation?
- (A) When handling utensils
 - (B) When preparing food
 - (C) When washing dishes
 - (D) When sitting in a break area
196. If eggs are not cooked and handled properly, they may cause a foodborne illness from this germ.
- (A) cholera
 - (B) salmonella
 - (C) mold
 - (D) listeria
197. It is ideal to plug in electrical appliances close to the sink.
- (A) False
 - (B) True
198. What cooking techniques will add a caramelized flavor when applied to meats and vegetables before adding them to a crockpot?
- (A) brown the meat and saute the vegetables
 - (B) saute the meat and brown the vegetables
 - (C) marinate the vegetables and the meat
 - (D) bring the meats and vegetables to room temperature
199. What is the main difference between WHMIS hazards represented by a circle containing a large T with a dot on the end from WHMIS hazards represented by the skull and crossbones?
- (A) They need repeated versus single exposure for injury/illness
 - (B) They involve different means of exposure
 - (C) They are different WHMIS classes of material
 - (D) They produce radiation injury rather than corrosive injury
200. WHICH TYPE OF LODGING IS MOST LIKELY TO RELY ON BUSINESS TRAVELERS AND TYPICAL EXPERIENCES LOW OCCUPANCY RATES ON WEEKENDS?
- (A) INTERNATIONAL AIRPORT
 - (B) LUXURY RURAL
 - (C) DOWNTOWN
 - (D) ECONOMY SUBURBAN

Cook

201. Identify which type of cookware is not suitable for induction stovetop cooking.

- (A) cast iron (B) glass
(C) ferromagnetic (D) stainless steel

202. to cook in the oven by dry heat

- (A) bake or roast (B) pare or peel
(C) toast (D) skewer

203. To mix solid shortening with flour by cutting the shortening into small pieces and mixing until it is completely covered with the flour mixture. Use a pastry blender, two knives, or a fork.

- (A) Knead
- (B) Mix
- (C) Fold In
- (D) Cut In

204. In addition to limes, acidity is added to Mexican cooking and pickling with this ingredient.

- (A) corn syrup
- (B) vinegars
- (C) pineapple juice
- (D) mango juice

205. Why is it important to avoid clutter in the refrigerator?

- ☐ A food won't be out of sight and spoil before we can eat it
 ☐ B better air circulation for contained food
- ☐ C increased ethylene gas that preserves food
 ☐ D fridge temperature will not fluctuate

206. How should you put the baskets into a deep fryer?

- ☐ A As quickly as possible
 ☐ B Slowly and carefully
- ☐ C Don't use baskets
 ☐ D Just drop them in

207. This is an adverse physical reaction to a food.

- (A) refusal (B) allergen
(C) symptom (D) allergy

Cook

208. Crème anglaise is a _____ custard.
- (A) gelatin set (B) yeast thickened
(C) basic egg thickened (D) starch thickened
209. Bavarian cream is a type of custard thickened with
- (A) cornstarch (B) gelatin
(C) yeast (D) flour
210. What is the function of baking powder when making muffins?
- (A) aids in browning (B) decreases baking time
(C) sweetens muffins (D) leavens dough
211. _____ to cut off the outer covering
- (A) parboil (B) preheat
(C) pare or peel (D) bake or roast
212. Stocks, broths, and consommés are all -----soups
- (A) Pureed (B) Clear
(C) Bisque (D) Thick
213. For a teenager, what is the range of fruit and vegetable servings a day suggested in the Canada Food Guide?
- (A) 3 vegetables and 3 fruits (B) 7-8
(C) 2-3 (D) 4-6
214. Identify the description that is not a type of custard.
- (A) starch thickened (B) gelatin set
(C) yeast thickened (D) basic egg thickened

Cook

215. What type of heat detector uses infrared and ultra violet sensors that respond to the movement of flame or to its radiant energy?

- (A) Flame detector
- (B) Rate of rise detector
- (C) Ionization detector
- (D) Thermostat detector

216. How many glasses of water should the average person drink each day?

- (A) 2 to 4
- (B) 6 to 8
- (C) 8 to 10
- (D) 4 to 6

217. TOURIST WHO VISITS PLACES IN ORDER TO ENJOY THEIR NATURAL BEAUTY ARE WHAT KIND OF TOURISTS?

- (A) RECREATIONAL
- (B) CULTURAL
- (C) HISTORIC
- (D) ENVIROMENTAL

218. What is the leading cause of knife injuries?

- (A) Sharp blades
- (B) Sticky food
- (C) Improper cutting techniques
- (D) Dull blades

219. Sandals are the best footwear for the kitchen since it can get so hot.

- (A) True
- (B) False

220. Identify the role of the Grillardin.

- (A) manager of the entire food service operation
- (B) dishwasher
- (C) vegetable chef
- (D) grill cook

221. Why do we need to wash our hands before we eat or handle food?

- (A) All
- (B) To avoid cross-contamination
- (C) To prevent illness
- (D) To keep our food germ-free

Cook

222. How long can fresh made-potato salad be stored in the cooler?
- (A) One day (B) Seven days
(C) Three days
223. If there is a grease fire in a pot or pan on the stove top, which of the following should NEVER be used to try and put out the fire?
- (A) baking soda (B) a tight fitting lid
(C) a flat baking sheet (D) water
224. What is the first step when cleaning and sanitizing a surface?
- (A) Wash the surface (B) Remove food from the surface
(C) Sanitize the surface (D) Rinse the surface
225. A letter sent employees within an organization about a new health-care policy is an example of ----- communication?
- (A) Organizational (B) Verbal
(C) Interpersonal (D) Written
226. Which of the following are potential effects of a health hazard?
Select all that apply?
- (A) Aspiration Hazard (B) Respiratory or Skin Sensitization
(C) Carcinogenicity (D) Explosive
227. How much cooking time will be added to the recipe if you open a crockpot lid during the cooking process?
- (A) 7-10 minutes (B) 30 seconds
(C) 15-20 minutes (D) 5 minutes
228. Identify the muffin method.
- (A) add all room temperature ingredients in one bowl (B) cut fat into flour first then add remaining ingredients
(C) cream butter or margarine with sugar first, then add remaining ingredients (D) blend dry ingredients first, then blend wet ingredients, then add together

Cook

229. A paring knife with a curved blade makes cutting rounded surfaces easier is known as a(n)
- (A) Chef's knife (B) Boning knife
(C) Tourne' (D) Scimitar
230. To check the temperature of food, place your thermometer
- (A) On the bottom surface (B) In the thinnest part
(C) In the thickest part (D) On the top surface
231. Which one of these foods is NOT from a plant?
- (A) cereal (B) spaghetti
(C) cheese (D) bread
232. Thawing raw chicken breasts in a pan on a prep table is an example of
- (A) Poor personal hygiene (B) Cross-contamination
(C) Poor cleaning and sanitizing (D) Time-temperature abuse
233. How many grams of protein are needed to produce four calories?
- (A) 3 (B) 4
(C) 2 (D) 1
234. Identify the source of cooking heat used for induction cooking.
- (A) electricity and steam (B) gas and steam
(C) gas and magnetism (D) electricity and magnetism
235. A class b fire extinguisher should an employee use to put out an fire?
- (A) Electrical equipment (B) Grease, oil, or liquid stored under pressure
(C) Paper ,cloth, wood, and plastic (D) Hot griddles

Cook

236. How should you hold a knife?

- (A) hold knife handle with one hand, relax your other hand by your side
- (B) hold knife handle with one hand and the blade with the other
- (C) hold knife handle with one hand and use your fingers to guide the blade
- (D) hold knife handle with one hand and the food item with the other with tucked in fingers

237. What is the shelf life for breaded filets?

- (A) There is no shelf life; breaded filets must be cooked immediately
- (B) 20 minutes
- (C) 15 minutes
- (D) 10 minutes

238. To prevent food allergens from being transferred to food

- (A) Clean and sanitize utensils before use
- (B) Store cold food at 41 f or lower
- (C) Avoid pewter tableware and cooper cook ware
- (D) Buy food from an approved, reputable supplier

239. How should food be labeled if stored out of its original container?

- (A) Food handlers name and title
- (B) Date and temperatures at the time of storage
- (C) Food handlers name and date
- (D) Contents and dates

240. For safety purposes, moving parts on machinery should be shielded.

- (A) True
- (B) False

241. A customer with a tree nut allergy orders a slice of apple pie. A scoop of almond ice cream is accidentally added to the pie plate. How should the server handle this order?

- (A) serve it to the customer, there isn't an allergen issue with ice cream
- (B) carefully scrape the ice cream off the plate, wipe off the pie and plate, and serve it to the customer
- (C) use designated tongs to remove the pie from the plate, wipe any ice cream off the pie, place the pie on a new plate and serve
- (D) place a new piece of pie on a new plate and serve it to the customer

Cook

242. The best use for a kitchen knife is

- (A) opening packages.
- (B) opening cans.
- (C) cutting food.
- (D) cutting cardboard.

243. Allows you to evenly glaze biscuits/cookies, or apply egg wash to pie crust.

- (A) tablespoon
- (B) metal spatula
- (C) pastry brush
- (D) rubber spatula

244. You've opened and used half a packet of caster sugar. How should you store the re-usable portion of sugar?

- (A) Cover and place in the area of the kitchen where it's likely to be needed by others.
- (B) Any leftover ingredients should be disposed of according to your establishment's waste management policy.
- (C) Put the opened packet near the door of the storage area so others can easily find it on the next shift.
- (D) Place in a clean container, cover and label with the storage date and contents. Store in the dry storage area.

245. A guest with a nut allergy orders a salad. You spot some almonds on the salad. What should you do?

- (A) Pick off the nuts
- (B) Tell your manager

246. Identify one of the last opportunities a server has when following safety protocol to ensure a guest with a food allergy is safe from an allergic reaction.

- (A) reviews food substitutions with the guest who has a food allergy
- (B) confirms with the kitchen that the order is the allergen special order meal
- (C) removes all condiments from the table that could be an allergen concern
- (D) presents the guest with a special allergen free menu

Cook

247. The very first thing you should do if you are the first to witness or discover an accident on the job site is to:

- ☐ (A) Go find at least one co-worker to help you so you can work as a team
- ☐ (B) Alert professional emergency responders
- ☐ (C) Report the incident to your supervisor
- ☐ (D) Provide first-aid to the victim(s)
- ☐ (E) Seek the assistance of the nearest co-worker

248. Halve this ingredient: 3 cups cornmeal.

- ☐ (A) 3/4 cup cornmeal
- ☐ (B) 1 1/8 tsp cornmeal
- ☐ (C) 1 1/2 cup cornmeal
- ☐ (D) 1 cup cornmeal

249. To remove the core of a fruit with a corer or paring knife.

- ☐ (A) Pare
- ☐ (B) Shred
- ☐ (C) Trim
- ☐ (D) Core

250. Identify the cooking method that does not enable the Maillard reaction to occur.

- ☐ (A) frying
- ☐ (B) steaming
- ☐ (C) steaming
- ☐ (D) broiling

251. Which hand tool cuts a thick layer from vegetables and fruits more efficiently than a paring knife?

- ☐ (A) grater
- ☐ (B) peeler
- ☐ (C) corer
- ☐ (D) zester

252. Broth is a liquid that contains pieces of chicken, fish, or vegetables.

- ☐ (A) False
- ☐ (B) True

Cook

253. How does cross-contact occur?

- (A) the pathogens from one surface or food transfer to another surface or food
- (B) a food allergen is ingested by someone with a food allergy
- (C) the immune system releases chemicals in response to a food allergen
- (D) a food comes into contact with another food and their proteins mix

254. to press dough with the palms of your hands- to incorporate air

- (A) knead
- (B) cream
- (C) steam
- (D) bread

255. The temperature of a roast is checked to see if it has met its critical limit of 145 f for 4 minutes. this is an example of which haccp principle?

- (A) Record keeping
- (B) Hazard analysis
- (C) Verification
- (D) Monitoring

256. Which method below describes the straight dough method for making yeast bread?

- (A) mix the flour, salt and baking powder separately
- (B) measuring all the ingredients, putting them in the mixer and blending
- (C) mixing, punching, resting and proofing
- (D) cut fat into flour before adding remaining ingredients

257. WHAT TYPE OF RESTURANT PROVIDES SERVING STAFF THAT TAKES ORDERS WHILE PATRONS ARE SEATED AND THE AVERAGE PER PERSON DINNER IS \$ 10 - \$25?

- (A) QUICK CASUAL RESTURANTS
- (B) FAMILY DINNING FULL SERVICE
- (C) FINE DINNING FULL SERVICE
- (D) CASUAL DINNING FULL -SERVICE

258. Meat from a fully grown sheep.

- (A) Mutton
- (B) Beef

259. Always use a cutting board. Never cut on counter surfaces, plates, sheet pans etc.

- (A) False
- (B) True

Cook

260. When extinguishing a gasoline fire, you should direct the fire extinguisher at the:
- (A) outer circumference of the fire.
 - (B) general direction of the fire.
 - (C) top of the flames.
 - (D) base of the flames.
261. Who is responsible for the overall planning, direction, and coordinating of a restaurant or foodservice operation?
- (A) Owner
 - (B) Sous chef
 - (C) Executive chef
 - (D) General manger
262. Water makes up most of our body weight.
- (A) True
 - (B) False
263. Is hard cheese safe to eat if there is visible mold on it?
- (A) yes, rinse the mold off under hot water
 - (B) yes, cut the mold off with an inch of cheese
 - (C) no, throw the whole piece of cheese away
 - (D) yes, wipe the mold off and briefly heat the cheese to kill left over bacteria
264. What are two things a manager must consider when determining the work schedule?
- (A) prior experience and employee availability
 - (B) resources available and leadership
 - (C) work schedules and customer relations
 - (D) purchasing procedures and menu costs
265. Unsaturated fats are healthy fats that your body needs.
- (A) False
 - (B) True

Cook

266. How can you reduce the number and type of cleaning tasks you have to complete at the end of a service period?
- (A) Use the cleaning schedule to ensure everyone knows their responsibilities.
 - (B) Clean and tidy your work area as you complete each task during preparation and service.
 - (C) Train all staff in correct cleaning techniques, so equipment and work areas are cleaned correctly, reducing repetition of tasks.
 - (D) Allocate cleaning tasks at the start of a shift amongst the team and monitor completion.
267. How can you protect ready-to-eat food when handling it?
- (A) All
 - (B) Use tongs or other utensils
 - (C) Use deli sheets
 - (D) Wear gloves
268. What is the most appropriate cooking method for cabbage and celery
- (A) Steaming
 - (B) Broiling
 - (C) Braising
 - (D) Baking
269. What liquid is usually used for making stock?
- (A) Chicken broth
 - (B) Boullion
 - (C) Beef broth
 - (D) Water
270. What type of training would you use if you needed to teach a new employee how to prepare menu items?
- (A) On-the-job training
 - (B) Role-playing
 - (C) Group-training
 - (D) Cross-training
271. What is a Food Recovery Program?
- (A) restaurants buy older food at discount prices
 - (B) recipe bank for cooking with leftovers
 - (C) composting scrap food
 - (D) grocery stores that donate excess food

Cook

272. Choose the dinner that is the MOST healthy.
- (A) water, steamed fish with lime and fresh steamed vegetables (B) real fruit juice, broiled chicken and fried potatoes
- (C) coke, hot chips and a burger (D) water, asparagus and fried schnitzel
273. The chemical process that occurs when oxygen in the air comes in contact with the flesh of cut fruit and turns brown is called
- (A) Seeding (B) Caramelizing
- (C) Enzymatic browning (D) Glazing
274. Identify the flat bottom cookware with sides that flare out at an angle and is ideal for frying, searing and browning.
- (A) grill pan (B) fry pan
- (C) saute pan (D) steamer pot
275. to allow food to stand in a sauce
- (A) grate (B) marinate
- (C) grease (D) mince
276. To cook in liquid, usually water, in which bubbles rise constantly and then break on the surface.
- (A) Stew (B) Boil
- (C) Poach (D) Dot
277. Which utensil should NEVER be used when cooking in a non-stick skillet or pan?
- (A) rubber scraper (B) wooden spatula
- (C) metal spatula

Cook

278. Why should you sort and assemble all your ingredients prior to starting to prepare them?

- (A) It helps ensure you have all the required ingredients and speeds up the preparation process.
- (B) It allows you to check your portion sizes before you start preparation.
- (C) It makes you read the recipe prior to commencing.
- (D) It helps you get the meals out on time.

279. What temperature should the butter be when making a butter cake?

- (A) cold
- (B) room temperature
- (C) warm
- (D) melted

280. Salmonella can be found in poultry, raw meats, milk and other dairy products.

- (A) True
- (B) False

281. Machine harvesting can be used to make high quality wine.

- (A) False
- (B) True

282. Which people made one of the earliest preserves known from quince and honey?

- (A) Portuguese
- (B) Italians
- (C) Australians
- (D) Chinese

283. A prep cook has been prepping raw chicken and wants to prep salads. Should he change gloves?

- (A) No
- (B) Yes

284. If a supplier substitutes an item for a similar item, it is necessary for the operation to

- (A) check the food label for allergens.
- (B) check the truck for cross contact issues.
- (C) reject the entire shipment.
- (D) reject the substitute items.

285. The first impression of an operation that guests receive is from the

- (A) Host/hostess
- (B) Server
- (C) General manager
- (D) Chef

Cook

286. Who is responsible for the kitchen team in the executive chef's absence and also lends his or her cooking expertise to overall food preparation?
- (A) Sous chef (B) Banquet chef
(C) Station chef (D) Nutritionist
287. Which action should a receiver take if cross contact occurs during a shipment?
- (A) reject some or all of the products (B) repackage broken cartons and torn wrapping
(C) ask that the shipment be reloaded (D) clean up any of the spilled allergens on the truck
288. to separate the food into tiny pieces by rubbing in on a grater
- (A) glaze (B) baste
(C) grease (D) grate
289. During meals at home, how should food be served in order to minimize waste?
- (A) serve on small plates (B) plated
(C) family style (D) leftovers should make up 50% of the meal
290. To rub shortening, fat, or oil, on the cooking surface of bakeware. Use waxed paper or paper towels to spread a thin, even layer.
- (A) Dredge (B) Sift
(C) Marinate (D) Grease
291. to mix ingredients lightly without mashing or crushing
- (A) toss (B) roll
(C) toast (D) cool
292. The process that removes lumps from a dry, powered ingredient and gives it a smoother consistency is called?
- (A) Flattening (B) Sifting
(C) Mixing (D) Blending

Cook

293. Which cooking method requires longer cooking times and often used with large cuts of meat or poultry?
- (A) poaching (B) Roasting
(C) pan - frying (D) Frilling
294. Federal regulation requires that hazardous information about a product be provided to all users of that product. What is the form used to provide this information?
- (A) Safety Information Form (SIF) (B) Hazardous Information Sheet (HIS)
(C) Occupational Safety and Hazard Form (OSHF) (D) Material Safety Data Sheet (MSDS)
295. Cholesterol occurs only in foods of plant origin.
- (A) False (B) True
296. An event in which property damage or injury is narrowly avoided is a(n)
- (A) Liability (B) Near miss
(C) Hazard (D) Accident
297. What are mystery shoppers?
- (A) Repeat guests who frequently complete comment cards (B) Guests who report a positive dining experience but never return
(C) Anonymous diners hired by an operation to critique the service (D) Customer appreciation programs that are run during the holidays
298. What organization requires Material Safety Data Sheets?
- (A) National Restaurant Association (B) Environmental Protection Agency
(C) Food and Drug Administration (D) Occupational Safety and Health Administration
299. To cut away most of the fat from the edges of meat.
- (A) Slice (B) Scrape
(C) Trim (D) Pare

Cook

300. To cut into long, thin pieces.

- (A) Cut
- (B) Sliver
- (C) Slice
- (D) Julienne

301. If food only touches the floor for 5 seconds it is safe to eat.

- (A) False
- (B) True

302. To beat rapidly with a rotary beater, an electric mixer, or wire whisk; to incorporate air and make light and fluffy, as whipped cream or egg white.

- (A) Whip
- (B) Stir
- (C) Beat
- (D) Mix

303. Identify the type of fish that the Ciguatera toxin is commonly found in.

- (A) tuna
- (B) cod
- (C) pollock
- (D) amberjack

304. to cut into small, even sided pieces

- (A) chop
- (B) score
- (C) core
- (D) cube

305. Why should food be fully thawed before adding to the crockpot?

- (A) thawed food is more flavorful than frozen food
- (B) thawed food takes up less space in the crockpot than frozen food
- (C) frozen food can only be cooked on the high temperature setting
- (D) frozen food may be in the danger zone for too long where bacteria can flourish

306. What is the first step in the cooling process?

- (A) Cool food from 135 to 70
- (B) Cool food from 135 to 41

Cook

307. WHMIS provides information to workers about hazardous materials through which of the following method(s)?

- ☐ (A) Safety Data Sheets
- ☐ (B) Supplier and workplace labels
- ☐ (C) Worker education and training
- ☐ (D) All of the above

308. Which type of potato is best to use for making sautéed potatoes?

- ☐ (A) All-purpose
- ☐ (B) Chefs
- ☐ (C) New
- ☐ (D) Russet

309. A flavorful liquid.

- ☐ (A) Water
- ☐ (B) Roux
- ☐ (C) Stock
- ☐ (D) Sauce

310. The best way to avoid getting your fingers caught in a mixer is to _____.

- ☐ (A) remove the beaters as soon as you turn off the mixer.
- ☐ (B) turn the beaters toward you when removing them.
- ☐ (C) turn the beaters away from you when removing them.
- ☐ (D) remove the beaters after unplugging the electric mixer.

311. To cook in hot fat.

- ☐ (A) pan-fry
- ☐ (B) deep-fat fry
- ☐ (C) fry
- ☐ (D) stir-fry

312. To cook under direct heat or over coals.

- ☐ (A) Roast
- ☐ (B) Bake
- ☐ (C) Toast
- ☐ (D) Broil

313. How many teaspoons are in a tablespoon?

- ☐ (A) 4
- ☐ (B) 2
- ☐ (C) 3
- ☐ (D) 1

314. Is it OK to wear nail polish when handling food?

- ☐ (A) No
- ☐ (B) Yes

Cook

315. The essential nutrients that provide nine calories per gram are _____.
Ⓐ carbohydrates Ⓑ fats
Ⓒ vitamins Ⓓ proteins
316. Which bacteria is found in the lower intestines of healthy humans?
Ⓐ Salmonella Ⓑ None
Ⓒ Norwalk Ⓓ E-Coli
317. Any type of clothing is safe to wear when cooking.
Ⓐ False Ⓑ True
318. The amount of space an item occupies is called?
Ⓐ Weight Ⓑ Measurement
Ⓒ Yield Ⓓ Volume
319. How can a food handler help prevent cross contamination when storing food?
Ⓐ Store food six inches off the floor Ⓑ Store raw and ready-to-eat food together
Ⓒ Leave food unwrapped and uncovered Ⓓ Store raw ground meat under raw poultry
320. ONE OF THE FIRST COOKBOOKS, DE RE COQUINARIA (ON COOKING) WAS WRITTEN BY
Ⓐ CATHERINE DE MEDICI Ⓑ EMPEROR LUCULLUS
Ⓒ KING HENRY THE II Ⓓ MARCUS APICIUS
321. When washing your hands, how long should you scrub with soap?
Ⓐ 5 to 7 seconds Ⓑ 10 to 15 seconds
Ⓒ 7 to 9 seconds Ⓓ 3 to 5 seconds

Cook

322. GHS is based on the same 4 building blocks of WHMIS and will provide improved protection for workers when handling hazardous material?
- ☐ (A) True
- ☐ (B) False
323. Do not use any kitchen equipment unless you understand its operation.
- ☐ (A) True
- ☐ (B) True
324. Molds and yeast are both fungi.
- ☐ (A) False
- ☐ (B) True
325. Identify the small appliance that is best suited for cooking at low temperatures for a long period of time.
- ☐ (A) toaster oven
- ☐ (B) microwave oven
- ☐ (C) crockpot or slow cooker
- ☐ (D) electric skillet
326. What information is provided on a food preparation list?
- ☐ (A) Requirements for preparation of daily specials and menu variations.
- ☐ (B) Standard recipes with an ingredients list.
- ☐ (C) Food production requirements and preparation deadlines.
- ☐ (D) Anticipated bookings for the next service period.
327. Nutrients that occur naturally in rocks and soil are _____.
- ☐ (A) vitamins
- ☐ (B) electrolytes
- ☐ (C) antioxidants
- ☐ (D) minerals
328. What is "turnover rate"?
- ☐ (A) type and size of the facility
- ☐ (B) cleanliness of the facility
- ☐ (C) average number of times a seat will be occupied in a given time period
- ☐ (D) the number of employees leaving the company

Cook

329. According to the Canada Food Guide, how many grain servings are in one cup of pasta?

- ☐ (A) 1
- ☐ (B) 3
- ☐ (C) 2
- ☐ (D) 6

330. Which is the largest fraction number?

- ☐ (A) $\frac{1}{2}$
- ☐ (B) $\frac{1}{4}$
- ☐ (C) $\frac{3}{8}$
- ☐ (D) $\frac{7}{8}$

331. Use a metal spoon to stir hot liquids on the stove top.

- ☐ (A) True
- ☐ (B) False

332. Dehydrating foods is a method of _____.

- ☐ (A) sous vide
- ☐ (B) enhancing nutrition
- ☐ (C) food preservation
- ☐ (D) bacteria elimination

333. What gives meat its dark red pigment and more pronounced flavor is myoglobin.

- ☐ (A) False
- ☐ (B) True

334. Starch is the most abundant carbohydrate in the diet.

- ☐ (A) True
- ☐ (B) False

335. Nutritional Facts are recommendations that specify the amounts of certain nutrients that the average person should obtain each day.

- ☐ (A) False
- ☐ (B) True

336. As long as a chemical container is first sanitized and then relabeled it is okay for use as a food storage container.

- ☐ (A) True
- ☐ (B) False

337. Which piece of equipment must be dedicated in order to avoid cross-contact?

- ☐ (A) grill
- ☐ (B) toaster
- ☐ (C) prep table
- ☐ (D) cutting board

Cook

338. Which is a common mistake made when boiling pasta?
- (A) too large pan
 - (B) too little water
 - (C) too much water
 - (D) water too hot
339. Egg shells are permeable and will
- (A) turn color as they age.
 - (B) add many nutrients if blended in a smoothie.
 - (C) absorb smells and flavors in your fridge.
 - (D) protect the egg from bacteria.
340. Chili peppers, avocados and squash are what type of vegetables
- (A) Seed
 - (B) Tuber
 - (C) Fruit
 - (D) Flower
341. What must be done before washing items in a dishwasher?
- (A) Scrape, rinse, or soak the items
 - (B) Air-dry the items
 - (C) Sainitize the items
 - (D) Wash the items
342. How can a food handler help prevent cross contamination when storing food?
- (A) Store food six inches off the floor
 - (B) Store raw and ready-to-eat food together
 - (C) Leave food unwrapped and uncovered
 - (D) Store raw ground meat under raw poultry
343. The temperature of a roast is checked to see if it has met its critical limit of 145 f for 4 minutes. this is an example of which haccp principle?
- (A) Hazard analysis
 - (B) Record keeping
 - (C) Monitoring
 - (D) Verification
344. To cut food into neat cubes - very small - 1/4" on all sides
- (A) Chop
 - (B) Dice

Cook

345. Spaetzle is a type of?

- ☐ (A) Pasta
- ☐ (B) Legume
- ☐ (C) Potatoes
- ☐ (D) Grain

346. For servers, Wearing-----will help to create a positive first impression.

- ☐ (A) Brightly polished jewelry
- ☐ (B) A clean, ironed uniform
- ☐ (C) Expensive, strong perfume
- ☐ (D) A hat or head-covering for sanitary purpose

347. WHICH CULINARY ADVANCEMENT CUISINE DID CATHERINE DE MEDICI BRING TO FRANCE

- ☐ (A) Noveau
- ☐ (B) Classic
- ☐ (C) Haute
- ☐ (D) Grand

348. The Globally Harmonized System (GHS) is an internationally consistent approach to classifying chemicals and communicating hazard information through labels and Safety Data Sheets?

- ☐ (A) True
- ☐ (B) False

349. To spread, brush, or pour liquid (such as sauce, drippings, melted fat, or marinades) over food while it's cooking. Use a baster, brush, or spoon.

- ☐ (A) Braise
- ☐ (B) Stir
- ☐ (C) Preheat
- ☐ (D) Baste

350. Used to measure by volume wet or dry ingredients of smaller quantity.

- ☐ (A) weigh scale
- ☐ (B) measuring spoons
- ☐ (C) dry measuring cup
- ☐ (D) graduated measuring cup

351. Yeast cells thrive on ____ .

- ☐ (A) bacteria
- ☐ (B) cold water
- ☐ (C) simple sugars
- ☐ (D) salt

Cook

352. Slang and buzzwords are known as?

- (A) Jargon
- (B) Prejudices
- (C) Gestures
- (D) Semantics

353. To cook in an oven or oven-type appliance in a covered or uncovered pan.

- (A) stew
- (B) roast
- (C) braise
- (D) bake

354. Which of the following is NOT an example of a biological hazard?

- (A) a piece of metal falls into the salad
- (B) dirty ice in a glass of water
- (C) preparing cooked and uncooked food on the same cutting board without cleaning and sanitizing in between
- (D) contamination caused by cockroaches

355. Cooked pasta can be refreshed before serving by placing it in?

- (A) Ice cold water
- (B) The freezer
- (C) Hot water
- (D) The cooler

356. When cooking with others, choose the safest order of actions when removing food from a hot oven.

- (A) put on oven mitts/no need to communicate/open oven door all the way
- (B) put on oven mitts/open oven door all the way/communicate that you are opening the oven
- (C) put on oven mitts/communicate that you are opening the oven/open oven door all the way
- (D) communicate that you are opening the oven/open oven door all the way/put on oven mitts

357. Identify the role of the Plongeur or Escuelerie.

- (A) in charge of cold food preparation and in charge of the pantry
- (B) dishwasher
- (C) senior and line cooks in charge of specific stations
- (D) fry cook

Cook

358. The first impression of an operation that guests receive is from the
- (A) Server
 - (B) Chef
 - (C) Host/hostess
 - (D) General manager
359. A two way communication that has immediate feedback is ----- communication?
- (A) Interpersonal
 - (B) Organizational
 - (C) Verbal
 - (D) Non verbal
360. What are two ingredient examples of acids?
- (A) baking soda and yeast
 - (B) baking soda and apple cider vinegar
 - (C) lemon juice and buttermilk
 - (D) baking soda and baking powder
361. PASTEURIZATION IS THE PROCESS OF
- (A) CANNING FOODS TO KEEP THEM FRESH AND SAFE TO EAT
 - (B) BOILING WATER TO ELIMATE GERMS.
 - (C) CLEANING COOKING UTENSILS TO MAKE SURE THEY ARE SAFE AND SANITARY
 - (D) HEATING MILK TO REMOVE HARMFUL BACTERIA
362. You always fry oil at a high temperature.
- (A) True
 - (B) False
363. How many tablespoons in a 1/4 cup?
- (A) 12
 - (B) 16
 - (C) 4
 - (D) 8
364. Identify the ingredients necessary to make pastry cream.
- (A) egg yolks, cream or milk, sugar
 - (B) cream, sugar, flour
 - (C) egg whites, cream or milk
 - (D) egg yolks, cream or milk thickened with starch, sugar

Cook

365. Which class of fire extinguisher should an employee use to put out an electrical fire?
- (A) b (B) abc
(C) a (D) c
366. Freezing destroys all harmful microorganisms in food.
- (A) False (B) True
367. Replacing a few ingredients can make some of your menu items gluten-free. Which substitution will NOT work as a replacement?
- (A) replace wheat pasta with rice noodles (B) replace flour tortillas with 100% corn tortillas
(C) replace soy sauce with wheat free tamari (D) replace orzo with couscous
368. How should food handlers keep their fingernails?
- (A) Short and polished (B) Long and unpolished
(C) Long and polished (D) Short and unpolished
369. Identify the main reason for keeping track of food waste in your home.
- (A) guide your food choices (B) buy more seasonal food
(C) eat more nutritious food (D) consume less food
370. What is the basic characteristic of a virus?
- (A) commonly found in cattle intestines (B) grows in food
(C) destroyed by cooking (D) requires a living host to grow
371. When is an appetizer served at a meal?
- (A) the beginning (B) it is not served
(C) the middle (D) the end

Cook

372. Why is it important to gently stir constantly when cooking custard on a stove-top?
- (A) to blend ingredients
 - (B) to stabilize eggs and prevent curdling
 - (C) to distribute flavour
 - (D) to dissolve sugar
373. The breast meat of poultry is the most flavorful part of the bird - especially when boneless and skinless - due to the low amounts of fat, connective tissue and collagen.
- (A) True
 - (B) False
374. Which piece of jewelry can be worn on a food handler's hand or arm?
- (A) Diamond ring
 - (B) Which piece of jewelry can be worn on a food handler's hand or arm?
 - (C) Plain band ring
 - (D) Medical bracelet
375. Fire equipment and safety switches are indicated by the color
- (A) red
 - (B) yellow
 - (C) orange
 - (D) blue
376. A two way communication that has immediate feedback is ----- communication?
- (A) Organizational
 - (B) Verbal
 - (C) Interpersonal
 - (D) Non verbal
377. A confined space is deemed ready for employee entry when:
- (A) A company's safety inspector has certified it
 - (B) The unit operations foreman declares it ready
 - (C) An engineer has completed the necessary calculations
 - (D) An independent inspection agency has completed their survey
 - (E) Your supervisor assigns you to the job
378. Food handlers should keep their fingernails?
- (A) Short an unpolished
 - (B) Long and painted with nail polish
 - (C) Long and un polished
 - (D) Short n painted with nail polished

Cook

379. To cook in hot fat that completely covers the food.

- ☐ (A) Fry
- ☐ (B) Stir-fry
- ☐ (C) Deep-fat Fry
- ☐ (D) Pan-fry

380. The measurement of an items resistance to gravity is called?

- ☐ (A) Length
- ☐ (B) Yield
- ☐ (C) Weight
- ☐ (D) Volume

381. Whole grains should be kept no more than _____ weeks?

- ☐ (A) Three
- ☐ (B) Four
- ☐ (C) Two
- ☐ (D) One

382. Whey is the liquid left after the solids have been removed from the milk.

- ☐ (A) True
- ☐ (B) False

383. Market Form is the form poultry is in when it is purchased.

- ☐ (A) False
- ☐ (B) True

384. 

Correctly identify this garnishing tool.

- ☐ (A) melon scoop
- ☐ (B) zester
- ☐ (C) butter curler
- ☐ (D) carrot curler

385. What is the relationship between provincial/territorial regulations and federal OH&S regulations?

- ☐ (A) Provincial regulations add to the federal ones
- ☐ (B) Provincial regulations contradict federal regulations
- ☐ (C) Provincial regulations replace the federal ones
- ☐ (D) Provincial regulations are more specific

Cook

386. _____ is a waxy, fat-like substance that is found only in animal products.
- (A) Saturated fats (B) Cholesterol
(C) Unsaturated fats (D) Trans fats
387. Rome and Granny Smith are types of
- (A) Oranges (B) Apples
(C) Pears (D) Bananas
388. The leaves, stem, or flowers of an aromatic plant are ?
- (A) Flavors (B) Spices
(C) Herbs (D) Seasonings
389. A sautoir is a pan with?
- (A) A wide , shallow bottom and a long term handle (B) The shape of a stockpot, but no handles
(C) Straight sides and a long handle (D) High, sloped sides and no handle
390. The process of sending and receiving information by talk, gestures, of writing for a response or action?
- (A) Messaging (B) Management
(C) Communication (D) Speaking
391. A band-aid in a salad is an example of a
- (A) physical contaminant. (B) biological hazard.
(C) chemical contaminant. (D) allergen
392. Iron has volatile aroma compounds that have a metallic smell.
- (A) False (B) True
393. Which cooking method provides the LEAST RISK for gluten cross-contact?
- (A) grill (B) boil
(C) saute (D) deep fry

Cook

394. If you have $\frac{3}{4}$ of a cup, how much more is needed to equal 1 cup?
- (A) $\frac{1}{4}$ cup (B) $\frac{3}{4}$ cup
(C) $\frac{1}{2}$ cup (D) $\frac{1}{8}$ cup
395. What is a roux in French cooking?
- (A) thickener (B) spice packet
(C) fresh herb medley (D) highly seasoned pate
396. The process of yeast converting sugar into carbon dioxide is known as _____.
- (A) kneading (B) proofing
(C) resting (D) fermentation
397. Which of the following is not an essential element necessary to produce an ordinary fire?
- (A) Hydrogen (B) Heat
(C) Fuel (D) Oxygen
398. Be aware of eating correct portion sizes of grains, because though healthy, whole grains can be high in
- (A) calories (B) iron
(C) phosphate (D) sodium
399. The penetration probe should be used to check the internal temperature of a beef roast.
- (A) True (B) False
400. Which of the following is not a legume?
- (A) Peanut (B) Cotton
(C) Clover (D) Alfalfa
401. Exercise and consuming plenty of fiber may help you avoid
- (A) lactose intolerance (B) inflammatory bowel disease
(C) foodborne illness (D) constipation

Cook

402.

Correctly identify this garnishing tool.

- ☐ (A) citrus carver ☐ (B) apple slicer corer
- ☐ (C) corer ☐ (D) melon scoop
403. On the job safety is the responsibility of:
- ☐ (A) the Leadworker ☐ (B) Yourself
- ☐ (C) the Supervisor ☐ (D) all
404. Carbohydrates are also known as _____.
- ☐ (A) soda, wheat and fiber ☐ (B) starch, wheat and fiber
- ☐ (C) starch, sugar and fiber ☐ (D) soda, sugar and fiber
405. to beat vigorously
- ☐ (A) boil ☐ (B) chop
- ☐ (C) whip ☐ (D) stir
406. Measure 2/3 cup shredded cheddar cheese with:
- ☐ (A) liquid measuring cup ☐ (B) measuring spoons
- ☐ (C) dry measuring cup
407. Which service style is considered simple and inexpensive, but is not as frequently used as the others?
- ☐ (A) American ☐ (B) French
- ☐ (C) English ☐ (D) Russian
408. Bechamel sauce is a mixture of roux and _____.
- ☐ (A) mayonnaise ☐ (B) tomatoes
- ☐ (C) dairy ☐ (D) stock

Cook

409. Identify the role of the Chef de Partie.

- (A) vegetable chef
- (B) senior and line cooks in charge of specific stations
- (C) prepares and manages entree dishes
- (D) butcher

410. A cutting board must be set aside and shown to a manager when it is

- (A) Faded in color
- (B) Chipped or cracked
- (C) Used for a different food
- (D) Used for longer than 6 months

411. What do you do when you have finished using a knife?

- (A) wash it individually in the sink, rinse it, dry it and put it away
- (B) put it away immediately
- (C) place it behind the taps and wash it with your other dishes
- (D) put it in the sink to soak

412. _____ are high in saturated fats.

- (A) Bread and potatoes
- (B) Corn oil and soybean oil
- (C) Whole milk and cheeses
- (D) All

413. _____ are nutrients made of carbon, hydrogen, and oxygen. The purpose is to supply energy for your body's functions.

- (A) Vitamins
- (B) Carbohydrates
- (C) Proteins
- (D) Fats

414. Unplug electric equipment before disassembling or cleaning.

- (A) False
- (B) True

415. Which of the following symptoms indicates heat stroke?

- (A) Dizziness, vomiting, cold skin, profuse sweating
- (B) Sudden affinity for country-western music
- (C) Cold and clammy skin, thirst, vomiting, confusion
- (D) Hot and dry skin, inability to drink, vomiting, confusion

Cook

416. To soak in a seasoned liquid, to add flavor and/or tenderize.
- (A) marinate (B) bread
(C) sift (D) flute
417. If you followed ingredient amounts perfectly but your muffins turned out dense and chewy, what is likely the cause?
- (A) under-baking (B) over greasing muffin tray
(C) over mixing the batter (D) over filling muffin batter in tray
418. Is it OK to handle food with long fingernails?
- (A) Yes (B) No
419. How costly are induction cooktops compared to gas and electric cooktops?
- (A) more expensive than gas and electric (B) less expensive than electric and the same cost as gas
(C) less expensive than gas and electric (D) more expensive than electric and less expensive than gas
420. When checking to see whether a guest is of legal age to drink alcohol, a ___ is an acceptable form of identification?
- (A) Credit card with signature (B) College id
(C) Passport (D) Birth certificate
421. It is advisable and safe to put all dirty dishes and utensils in the washing sink at once.
- (A) True (B) False
422. Don't fill pans so full that they are likely to spill hot foods.
- (A) False (B) True
423. It is important to cook food to high enough temperature so that
- (A) Pathogens are reduced and illness is prevented (B) Food looks fully cooked when served to a guest
(C) Allergens are reduced to nontoxic levels (D) The possibility of cross-contamination is greatly reduced

Cook

424. The term RDA stands for:

- (A) recommended dietary allowances
- (B) requested daily allowances
- (C) required daily allotment
- (D) required dietary allowances

425. An asphyxiate hazard is defined as?

- (A) A gas that spontaneously ignites in the air
- (B) A substance or chemical that poses acute toxicity
- (C) A substance or mixture that displaces oxygen in the atmosphere
- (D) A finely divided solid material that can catch fire or explode

426. Which measuring equipment will you use to measure 1/2 cup flour?

- (A) 1/3 cup
- (B) 1/3 cup and 1/4 cup
- (C) tablespoon
- (D) 1/2 cup

427. What is the minimum distance a portable ladder is to extend above a work platform?

- (A) 12"
- (B) 28"
- (C) 36"
- (D) 24"

428. Which of the following will not reduce the amount of fat in your diet?

- (A) drinking skim milk instead of whole milk
- (B) trimming the fat off of meat
- (C) using regular margarine instead of butter
- (D) adding less fat when you cook

429. How can a food handler prevent cross-contamination when prepping raw meat and ready-to-eat food?

- (A) Wear gloves when handling the meat, but not the ready-to-eat food
- (B) Clean and sanitize the work surfaces between each product
- (C) Hold both products at the correct temperature
- (D) Prepare them at the same time on the same prep table

430. Cut food into small, irregular pieces.

- (A) Chop
- (B) Quarter
- (C) Dice
- (D) Cube

Cook

431. To tell if the cupcakes are finished you use a ____ .
- (A) Finger (B) Toothpick
- (C) Baseball bat
432. When would WHMIS require the use of a workplace label?
- (A) When the MSDS is missing from a controlled product. (B) When the instructions for use are missing
- (C) When a controlled product is shipped from the manufacturer. (D) When a controlled product is transferred from its' original container
433. Sneezing into food while preparing it is an example of:
- (A) None (B) Chemical contamination
- (C) Biological contamination (D) Physical contamination
434. What type of vegetables form is rich in sugars, starches, vitamins and minerals and exists both above and below ground
- (A) Roots (B) Flower
- (C) Stem (D) Tuber
435. The immune systems of very young children, pregnant women, the elderly, and chronically ill people are at greatest risk to develop food-borne infections.
- (A) False (B) True
436. To cook gently in a hot liquid below the boiling point.
- (A) Scald (B) Poach
- (C) Saute (D) Steam
437. Identify the definition of a sauce.
- (A) a liquid with chili peppers as a base (B) a thickened liquid used to flavor and enhance other foods
- (C) powered seasonings mixed with water (D) a liquid with fresh herbs

Cook

438. Why is it very important to make sure equipment is clean before preparing ingredients for cakes, pastries and breads?

- (A) Many ingredients have a high water content, which could cause the equipment to rust and discolour the ingredients being prepared.
- (B) Many of the ingredients are high-risk foods that may not be processed further during preparation, so the risk of cross-contamination is higher.
- (C) The recipes usually combine ingredients from many different types of food groups together, so the risk of cross-contamination is higher
- (D) Recipes require ingredients to be cut very finely so there is a greater risk of food becoming stuck in the equipment.

439. What method should never be used to thaw food?

- (A) place the item in a cooler
- (B) place the item on a prep counter
- (C) microwave the item
- (D) cook the item

440. Identifying with another person's feeling or thoughts is called?

- (A) Empathy
- (B) Sympathy
- (C) Esteem
- (D) Respect

441. The beer ingredient that constitutes about 95% by volume?

- (A) Hops
- (B) Water
- (C) Malt
- (D) Yeast

442. Fractions can be added once they have a ?

- (A) Common denominator
- (B) Common numerator
- (C) Decimal
- (D) Dividend

443. What are mystery shoppers?

- (A) Customer appreciation programs that are run during the holidays
- (B) Guests who report a positive dining experience but never return
- (C) Anonymous diners hired by an operation to critique the service
- (D) Repeat guests who frequently complete comment cards

Cook

444. In Ontario, front-line supervisors who have knowledge of OH&S acts and regulations, and are familiar with potential hazards are deemed to be what?

- (A) competent
- (B) certified
- (C) trained
- (D) experienced

445. The only ingredient in baking soda is _____.

- (A) carbon dioxide
- (B) aluminum
- (C) monocalcium phosphate
- (D) sodium bicarbonate

446. to add water to a concentrated food to restore it to its natural state

- (A) grease
- (B) reconstitute
- (C) toast
- (D) score

447. Puddings are an example of a _____ custard.

- (A) egg thickened
- (B) gelatin set
- (C) yeast thickened
- (D) starch thickened

448. What is the difference between white and brown eggs?

- (A) nutrition
- (B) weight
- (C) color
- (D) location of production

449. A CRITICAL CONTROL POINT (CCP) IS A POINT

- (A) IN A RECIPE WHEN INGREDIENTS ARE ADDED
- (B) WHEN CHEMICALLY CONTAMINATED FOODS IS IDENTIFIED
- (C) WHEN MEASURES CAN BE APPLIED TO PREVENT HAZARDS
- (D) IN THE COOKING PROCESS WHERE FOOD IS TASTED

450. to put dry ingredients through a strainer

- (A) melt
- (B) dice
- (C) sift
- (D) sear

Cook

451. To cook meat slowly, covered and in a small amount of liquid or steam.

- (A) Braise
- (B) Steam
- (C) Pan-broil
- (D) Brown

452. Identify the role of the Garde Manger.

- (A) sauce chef
- (B) in charge of cold food preparation and in charge of the pantry
- (C) ice-cream cook
- (D) prepares staff meal

453. What is the correct way to cover an infected wound?

- (A) With a bandage
- (B) With a glove and a bandage
- (C) With a glove

454. A nutrient is a chemical substance in food that helps maintain the body.

- (A) False
- (B) True

455. What is the first step in the cooling process?

- (A) Cool food from 135 to 70
- (B) Cool food from 135 to 41

456. What is a class "A" fire?

- (A) combustible metals such as magnesium and sodium.
- (B) electrical equipment, motors, switches
- (C) ordinary combustions like wood, paper, etc
- (D) gasoline

457. A letter sent employees within an organization about a new health-care policy is an example of ----- communication?

- (A) Interpersonal
- (B) Organizational
- (C) Written
- (D) Verbal

458. Identify all the types of cookware that may be used on induction cooktops.

- (A) copper
- (B) ferromagnetic
- (C) glass
- (D) aluminum

Cook

459. A food handler must wear single-use gloves when
- (A) Handling ready-to-eat food
 - (B) Operating a dishwashing machine
 - (C) Working at a cash register
 - (D) Busing tables
460. To cook in liquid just below the boiling point. The tiny bubbles that form should break before they reach the surface.
- (A) Simmer
 - (B) Steam
 - (C) Steep
 - (D) Stew
461. When scaling a recipe up from four servings to ten servings, what will be the new measure for the original 2 Tbsp (30 ml) of chopped fresh basil?
- (A) (90 ml)
 - (B) (67.5 ml)
 - (C) (75 ml)
 - (D) (60 ml)
462. The cooking method that cooks food quickly, often uncovered, in very small amount of fat over high heat is?
- (A) Stewing
 - (B) Sautéing
 - (C) Pan-frying
 - (D) Simmering
463. For a teenager, what is the range of milk/alternative servings a day suggested in the Canada Food Guide?
- (A) 5-6
 - (B) 125 ml-250 ml
 - (C) 3-4
 - (D) 1-2
464. What is cross-contact?
- (A) When pathogens are transferred from one surface or food to another
 - (B) When a food item containing an allergen comes in contact with another food
 - (C) When cutting chicken and veggies on the same cutting board
465. Blue-veined cheese is injected with a harmful mold.
- (A) True
 - (B) False

Cook

466. Pests can do which two types of damage?
- (A) Physical and biological
 - (B) Nutritional and physical
 - (C) Chemical and nutritional
 - (D) Biological and chemical
467. Identify the safest way to defrost meat.
- (A) on the top shelf of the refrigerator
 - (B) in warm water in the sink
 - (C) on the counter overnight
 - (D) on the bottom shelf of the refrigerator
468. Identify the three core staples of Mexican cooking.
- (A) avocados, corn, chiles
 - (B) wheat tortillas, beans, chiles
 - (C) corn, beans, chiles
 - (D) corn, beans, chocolate
469. Identify the ingredients in Hollandaise Sauce.
- (A) egg yolks, clarified butter, an acid
 - (B) egg whites, clarified butter, mayonnaise
 - (C) egg whites, clarified butter, an acid
 - (D) egg yolks, olive oil, an acid
470. to brown quickly with intense heat
- (A) steam
 - (B) sear
 - (C) season
 - (D) stir
471. The ratio of liquid to flavoring ingredients in vegetables stock is?
- (A) 2lbs of vegetables to 4qts of water yield 1 qt
 - (B) 1lb of vegetables to 1qt of water to yield 1qt of stock
 - (C) 11lbs of vegetables to 5 qts of water to yield 1 gal of stock
 - (D) 8lbs of vegetables to 6 qts of water to yield 1 gal of stock
472. Both food allergies and food intolerances affect the body's immune system.
- (A) True
 - (B) False

Cook

473. Which of the following is given to a product, along with the approval of the efficacy claims on the table, to ensure the product is safe and effective:

- (A) EPA registration number
- (B) toll-free number
- (C) retail number
- (D) bar code

474. How many different types of pasta are there?

- (A) 250
- (B) 444
- (C) 550
- (D) 350

475. What is the purpose of a class A ground fault circuit interrupter?

- (A) overload and short circuit only
- (B) overload reverse current and ground fault
- (C) for short circuit and ground fault only
- (D) overload short circuit and ground fault

476. The edible seed of grain without its husk or hull is called the?

- (A) Kernel
- (B) Germ
- (C) Endosperm
- (D) Bran

477. What is the difference between an essential and nonessential nutrient?

- (A) Essential nutrients must be obtained from the diet while nonessential can be synthesized.
- (B) Essential nutrients can be synthesized while nonessential must be supplemented in the diet
- (C) Essential nutrients are obtained from direct sunlight while nonessential must be added to the diet
- (D) Essential nutrients must be given subcutaneously from while nonessential must be supplemented in the diet

478. For a teenager, what is the range of meat/alternative servings a day suggested in the Canada Food Guide?

- (A) 6-7
- (B) 8-9
- (C) 1-4
- (D) 2-3

Cook

479. to let stand at room temperature until it doesn't feel warm
- (A) roll (B) cool
(C) boil (D) chop
480. What should a food handler do if a customer is experiencing an allergic reaction?
- (A) Do not get involved due to lawsuit potential (B) Perform the heimlich maneuver
(C) Call the emergency number for assistance (D) Wait and see if the condition goes away on its own
481. to add salt, pepper or other ingredients that make the food taste better
- (A) grease (B) season
(C) drain (D) sear
482. Unsaturated fats are
- (A) the same as saturated fats. (B) usually liquid at room temperature.
(C) found mainly in meat and milk products. (D) All
483. What is the proper way to pass a knife to another person?
- (A) put the knife in its carrying case, and hand it to the person (B) place the knife on a sanitized surface, and let the person pick it up by the handle
(C) hand it to the person by the handle (D) hand it to the person by loosely holding onto the table
484. This type of heavy cookware is ideal for long, slow recipes such as stew. It has two sturdy handles and a heavy tight-fitting lid.
- (A) wok (B) roaster
(C) non-stick skillet (D) dutch oven
485. First in , first out (fifo) is a method of
- (A) TEMPERTURE CONTROL (B) RECORD KEEPING
(C) STOCK ROTATION (D) PEST CONTROL

Cook

486. Fruits that have a central pit enclosing a single seed are known as
- (A) Tropical fruits (B) Drupes
(C) Winter fruits (D) Summer fruits
487. When using the FIFO method correctly, the food stored in the front should be the food that
- (A) Will expire last (B) Was received first
(C) Was received last (D) Will expire first
488. Stocks, broths, and consommés are all -----soups
- (A) Clear (B) Bisque
(C) Pureed (D) Thick
489. to cook in a small amount of water in a covered container
- (A) drain (B) baste
(C) braise (D) grease
490. Which of these grain products is available in both refined and whole grain varieties?
- (A) all (B) pasta
(C) bread (D) crackers
491. to cut narrow grooves or gashes in food
- (A) cube (B) score
(C) cool (D) core
492. The Maillard reaction begins with a simple reaction between which two substances?
- (A) fat and sugar (B) amino acids and fat
(C) carbohydrates and sugar (D) amino acids and sugar

Cook

493. to heat sugar or food containing sugars until a syrup of brown color and caramel flavor develops
- (A) braise (B) caramelize
(C) sterilize (D) marinate
494. Identify the role of the Potager.
- (A) roasts and braises meats (B) pastry chef
(C) works under and reports to Chef de Cuisine, helps with kitchen management (D) soup cook
495. In case of an oil fire you should
- (A) add more oil to cool the temperature. (B) douse the flames with water.
(C) immediately leave the area. (D) smother the flames.
496. What is the meaning of the French term “mis en place”?
- (A) To work smart (B) To place on a dish or plate
(C) To listen carefully (D) To put in place
497. It is safe to use only one oven mitt to remove food from the oven.
- (A) False (B) True
498. to cut or chop into very fine pieces
- (A) dice (B) mix
(C) melt (D) mince
499. When lifting the lid off of a hot pot, you should lift
- (A) to the front of the pot. (B) to the back of the pot.
(C) to the side of the pot. (D) don't use lids.
500. It is safe to wait until you are finished cooking before cleaning any spills from the floor.
- (A) True (B) False

Cook

501. Surfaces that touch food must be

- ☐ (A) Rinsed and sanitized
- ☐ (B) Rinsed only
- ☐ (C) Cleaned only
- ☐ (D) Cleaned and sanitized

502. Blue-veined cheese is injected with a harmful mold.

- ☐ (A) True
- ☐ (B) False

503. At what temperature should you bake rolls?

- ☐ (A) 200 °C.
- ☐ (B) 160 °C
- ☐ (C) 180 °C.
- ☐ (D) 230 °C.

504. Slang and buzzwords are known as?

- ☐ (A) Prejudices
- ☐ (B) Jargon
- ☐ (C) Gestures
- ☐ (D) Semantics

505. Identify the correct conversion factor when scaling a recipe up from four servings to eight servings.

- ☐ (A) 5
- ☐ (B) 0.2
- ☐ (C) 0.5
- ☐ (D) 1.2

506. How many grams of sugar are in an egg?

- ☐ (A) 3
- ☐ (B) 1
- ☐ (C) 0
- ☐ (D) 4

507. What is the first step in making a shake?

- ☐ (A) Add Syrups
- ☐ (B) Add Powders
- ☐ (C) Add Water
- ☐ (D) Write name on the lid

508. A thick soup with tomatoes, vegetables, and pasta in Italy.

- ☐ (A) Minestrone
- ☐ (B) Risotto

Cook

509. Efficiently removes batters from bowls and sauces from pots.
- (A) wooden spoon (B) rubber spatula
(C) rotary beater (D) wire whisk
510. A ____ could be used to chop, sliced, mix, blend, and knead dough.
- (A) electric oven. (B) food separator.
(C) food processor. (D) electric blender.
511. To combine ingredients until soft and creamy using a spoon, beater, or mixer.
- (A) Cream (B) Stir
512. When short light waves are absorbed by wine it releases what kind of compounds
- (A) esters (B) aldehydes
(C) sulfurous (D) phenols
513. An important function of proteins is
- (A) supplying energy for your body's functions. (B) assisting any chemical reactions.
(C) supplying your body with energy, forms your cells, maintains body temperature, and protect your nerves. (D) playing a role in the growth and repair of your body's tissues.
514. During oxidation of foods, carbon dioxide, water, and energy are given off.
- (A) False (B) True
515. If food-contact surfaces are in constant use, they must be cleaned and sanitized every__ hours?
- (A) 6 (B) 8
(C) 4 (D) 2

Cook

516. Sterilize

- (A) To kill bacteria by heating, generally applied to milk or fruit juice
- (B) To destroy microorganisms with heat
- (C) To cook slowly in liquid over low heat

517. The bones from all types of poultry can be used to make stock.

- (A) False
- (B) True

518. The proper word for cow meat is

- (A) turkey
- (B) poultry
- (C) lamb
- (D) beef

519. To mix with a circular motion of a spoon or other utensil.

- (A) Stir
- (B) Whip
- (C) Mix
- (D) Blend

520. Which of the following foods contains a Big Eight allergen

- (A) Pickles
- (B) Pecan pie
- (C) Sliced deli meat

521. What food may be re-served to customers?

- (A) unused whole fruit garnish
- (B) uneaten food
- (C) unused, uncovered condiments
- (D) unopened pre-packaged food

522. Identify the role of the Commis.

- (A) manager of the entire food service operation
- (B) butcher
- (C) junior cook, works under one of the Chefs de Partie
- (D) fry cook

523. Identify which grains are high in protein.

- (A) amaranth
- (B) quinoa
- (C) all
- (D) barley

Cook

524. Before preparing food for a guest with a food allergy, what should a food handler do to keep the guest safe?
- (A) wash hands, put on clean gloves and a clean apron
 - (B) wash hands, change gloves, put a clean apron on over old apron
 - (C) apply hand sanitizer to gloved hands
 - (D) wipe apron off with single use paper towel, wash hands and change gloves
525. Some researchers believe that ----- can impair your written communication skills?
- (A) Texting
 - (B) Emailing
 - (C) Typing
 - (D) Audio taping
526. Which symptom must a food handler report to a manager?
- (A) Aching neck
 - (B) Diarrhea
 - (C) Headache
 - (D) Muscle stiffness
527. What is the definition of a Class B fire?
- (A) Fires involving flammable liquids, gases, gasoline and synthetic or oil-based products.
 - (B) Fires involving common combustibles such as wood, paper, cloth, rubber and trash.
 - (C) Fires that involve energized electrical equipment, such as wiring, controls, motors or appliances
 - (D) Fires that involve combustible metals such as magnesium and sodium.
528. Which of these is a TCS food?
- (A) Dry crackers
 - (B) Uncooked rice
 - (C) Baked bread
 - (D) Baked potato
529. A mandolin is used to?
- (A) Slice precisely
 - (B) Sharpen knives
 - (C) Make a turned cut
 - (D) Hone knives

Cook

530. A CRITICAL CONTROL POINT (CCP) IS A POINT

- (A) IN A RECIPE WHEN INGREDIENTS ARE ADDED
- (B) WHEN MEASURES CAN BE APPLIED TO PREVENT HAZARDS
- (C) IN THE COOKING PROCESS WHERE FOOD IS TASTED
- (D) WHEN CHEMICALLY CONTAMINATED FOODS IS IDENTIFIED

531. What should food operators do to prevent the spread of Hepatitis A?

- (A) cook food to minimum internal temperatures
- (B) exclude staff with jaundice from the operation
- (C) purchase mushrooms from approved, reputable suppliers
- (D) freeze fish for 36 hours before serving

532. What four things should you keep in mind when identifying and selecting ingredients for cakes, pastries and breads?

- (A) Special customer requests, quantities to be produced, portion control, deadlines.
- (B) How the ingredients look, feel, smell and taste.
- (C) Cost, food production requirements, recipe and quality.
- (D) Recipe, quality, freshness and stock rotation requirements.

533. The 2 goals of the Hazard Communication Standard are to

- (A) qualify them for upward positions within the company.
- (B) keep up the appearance of knowing what to do.
- (C) inform employees about the physical and health hazards of the chemical products to which they are potentially exposed to at work.
- (D) train employees about the physical and health hazards of the chemical products to which they are potentially exposed to at work.

534. to destroy microorganisms

- (A) steam
- (B) braise
- (C) glaze
- (D) sterilize

535. To cut off the outside covering of a fruit or vegetable.

- (A) Mince
- (B) Core
- (C) Dice
- (D) Pare

Cook

536. All protein is a good source of?

- (A) Niacin
- (B) All
- (C) Riboflavin
- (D) Phosphorus

537. Halve this ingredient: 1 1/3 cup semisweet chocolate.

- (A) 1 cup semisweet chocolate
- (B) 2/3 cup semisweet chocolate
- (C) 1/2 cup semisweet chocolate
- (D) 1/4 cup semisweet chocolate

538. Place hot pots and baking dishes on a hot pad when they are removed from the oven.

- (A) False
- (B) True

539. An oven that cooks using tiny energy waves is called a _____ oven.

- (A) microwave
- (B) convectional
- (C) tabletop
- (D) broiler

540. Chocolate contains ingredients that may be addictive for some people.

- (A) False
- (B) True

541. This type of poultry is a mature female and though flavorful is less tender than a fryer. It is usually over seven months in age and weighs two pounds and over. The best cooking method for this type of poultry is to braise or stew.

- (A) fowl
- (B) pigeon
- (C) turkey
- (D) foie gras

542. What task requires food handlers to wash their hands before and after doing it?

- (A) taking out garbage
- (B) handling raw meat, poultry, or seafood
- (C) touching clothing or aprons
- (D) using chemicals that might affect food safety

543. Under GHS, which of the following is NOT classified as a health hazard?

- (A) Skin corrosion/irritation
- (B) Germ cell mutagenicity
- (C) Carcinogenicity
- (D) Explosives

Cook

544. Poultry is a high quality source of this nutrient.

- (A) carbohydrate
- (B) Vitamin A
- (C) protein
- (D) potassium

545. Should you use hot-holding equipment to reheat food?

- (A) No
- (B) Yes

546. to change solid food to liquid by heat

- (A) mix
- (B) sear
- (C) roll
- (D) melt

547. What should you do with a swollen can of food?

- (A) discard the can without opening it
- (B) all
- (C) open the can and discard if it smells bad

548. Which of the following is true about minerals?

- (A) Minerals are components of various substances.
- (B) Minerals help to control certain processes in the body.
- (C) all
- (D) Minerals are components of some organs.

549. Which practice could contaminate food?

- (A) Moving clean glasses using a rack or tray
- (B) Serving different food items with the same utensil
- (C) Holding clean utensils by the handles
- (D) Carrying dishes of food by the bottom or edge

Cook

550.

Correctly identify this garnishing tool.

- (A) citrus juicer (B) zester
(C) butter curler (D) carrot curler
551. The form of cooking in which a vegetable is quickly and partially cooked in hot water is known as
(A) Parboiling (B) Sous vide
(C) Poaching (D) Blanching
552. When cooking chicken breasts, which cooking method is not appropriate?
(A) Grilling (B) Stir-frying
(C) Roasting (D) Braising
553. Which measuring equipment will you use to measure $\frac{3}{4}$ cup?
(A) 1 cup (B) $\frac{1}{8}$ cup
(C) $\frac{1}{2}$ cup and $\frac{1}{4}$ cup (D) $\frac{1}{2}$ cup
554. Which food should be rejected during receiving?
(A) Oranges with a strong citrus scent (B) Shrimp with ice crystals
(C) Chicken breast at 40 (D) Turkey at 137
555. ONE OF THE FIRST COOKBOOKS, DE RE COQUINARIA (ON COOKING) WAS WRITTEN BY
(A) EMPEROR LUCULLUS (B) KING HENRY THE II
(C) MARCUS APICIUS (D) CATHERINE DE MEDICI

Cook

556. Hands should be washed when handling raw food
- (A) after only.
 - (B) before only.
 - (C) both before and after.
557. A SERVICE OR PRODUCT PROVIDED TO GUESTS FOR THEIR CONVENIENCE, EITHER WITH OR WITHOUT AN ADDITIONAL FEE, IS A(N)
- (A) CATERING SERVICE
 - (B) DONATION
 - (C) ENDOWMENT
 - (D) AMENITY
558. Your baked muffins are dark brown on top and sticky in the center. What is likely the problem?
- (A) too much sugar and overcooked
 - (B) not enough sugar and overcooked
 - (C) not enough sugar and undercooked
 - (D) too much sugar and undercooked
559. What should the cooking temperature of poultry be?
- (A) 145 degrees F.
 - (B) 135 degrees F.
 - (C) 155 degrees F.
 - (D) 165 degrees F.
560. An egg that is cooked in a pan of boiling water, salt, and vinegar is:
- (A) Poached
 - (B) Braised
 - (C) Roasted
 - (D) Baked
561. Identify the role of the Sous Chef.
- (A) usually a student, gaining kitchen experience doing a variety of tasks
 - (B) soup cook
 - (C) roasts and braises meats
 - (D) works under and reports to Chef de Cuisine, helps with kitchen management
562. Identify the popular secondary sauce that can be prepared from a basic Bechamel sauce.
- (A) Bordelaise sauce
 - (B) Mornay sauce
 - (C) Aioli
 - (D) Beurre manie

Cook

563. What is the first step when cleaning and sanitizing a surface?
- (A) Wash the surface (B) Rinse the surface
(C) Remove food from the surface (D) Sanitize the surface
564. The body parts most often injured in shop accidents are the body and ____
- (A) neck (B) arms and hands
(C) toes (D) head
565. What is tunneling?
- (A) when a toothpick is inserted into a muffin to test doneness (B) muffins split open on top
(C) muffins are full of tubular holes (D) when muffins sound hollow
566. to cut into small pieces
- (A) cool (B) whip
(C) chill (D) chop
567. What is the biggest food safety risk when a food handler wears dirty clothes to work?
- (A) Other employees might make fun of the food handler (B) Dirty clothes might carry pathogens
(C) The food handler might smell (D) Customers might be offended
568. The amount of energy needed from food depends on which of the following?
- (A) weight (B) all
(C) age (D) sex/gender
569. This chef is responsible for butchering the meat and poultry.
- (A) Boulanger (B) rotisseur
(C) grillardin (D) Boucher
570. If you get a burn, immediately run cold water on it.
- (A) False (B) True

Cook

571. What is the proper way to wash your hands after picking up trash from the floor?
- (A) Rinse your hands briefly with very hot water
 - (B) It is not necessary to wash your hands after picking up trash from the floor
 - (C) Rinse your hands for 30 seconds with any temperature water
 - (D) Wet your hands with warm water, apply soap, rub and thoroughly clean all parts of your hands and fingers, rinse with warm water, then dry your hands
572. A class b fire extinguisher should an employee use to put out an fire?
- (A) Paper ,cloth, wood, and plastic
 - (B) Hot griddles
 - (C) Electrical equipment
 - (D) Grease, oil, or liquid stored under pressure
573. What are the things that are affected by what you eat?
- (A) how you feel
 - (B) how you function
 - (C) all
 - (D) appearance
574. When transporting food items off-site, the label should include the name of the food,use-by date and time, and
- (A) Driving and delivery instructions
 - (B) Reheating and service instructions
 - (C) Invoice and receipt
 - (D) Time and temperature logs
575. A measuring system used throughout most of the world is called:
- (A) International Measuring System
 - (B) Customary System
 - (C) Euro System
 - (D) Metric System
576. Which of these ingredients may not be safe for people on a gluten free diet?
- (A) modified food starch
 - (B) all
 - (C) hot chocolate mix
 - (D) mustard

Cook

577. to cause a dry substance to pass into a liquid

- (A) core
- (B) dice
- (C) score
- (D) dissolve

578. Which practice could contaminate food?

- (A) Moving clean glasses using a rack or tray
- (B) Serving different food items with the same utensil
- (C) Holding clean utensils by the handles
- (D) Carrying dishes of food by the bottom or edge

579. When employee learns the functions of another job within the operation is it known as?

- (A) On-the-job training
- (B) Group-training
- (C) Cross-training

580. Identify the sauce that is made form a light stock and blond roux.

- (A) Espagnole
- (B) Veloute
- (C) Hollandaise
- (D) Bechamel

581.

What does the following consumer product symbol indicate?

- (A) The product in the container is poisonous
- (B) The container is explosive
- (C) The container is flammable
- (D) The product in the container is corrosive

582. Which symptom must a food handler report to a manager?

- (A) Diarrhea
- (B) Muscle stiffness
- (C) Aching neck
- (D) Headache

Cook

583. Which action could cause cross-contamination in a self-service area?
- (A) Customers returning to the food bar with their original plates
 - (B) Customers using ice from the ice machine in their drinks
 - (C) Food handlers putting clean utensils on the self-service line
 - (D) Food handlers labeling all cold salads and sauces
584. Identify which option is not part of whole wheat.
- (A) germ
 - (B) bran
 - (C) endosperm
 - (D) shell
585. Identify the classic base for Espagnole sauce.
- (A) tomatoes
 - (B) roasted veal stock
 - (C) fish stock
 - (D) egg yolks and butter
586. Quality customer service will most likely result in?
- (A) Higher turnover
 - (B) Lower payroll
 - (C) Increased marketing costs
 - (D) Better customer loyalty
587. Vegans include eggs and dairy products in their diets.
- (A) True
 - (B) False
588. To determine how much of an item is needed to yield an AP amount?
- (A) Add the yield percentage to the edible portion amount
 - (B) Divide the yield percentage by the edible portion amount
 - (C) Divide the edible portion amount needed by the yield percentage
 - (D) Multiply the edible portion amount needed by the yield percentage
589. The process of sending and receiving information by talk, gestures, or writing for a response or action?
- (A) Speaking
 - (B) Messaging
 - (C) Communication
 - (D) Management

Cook

590. Identify the reason why foods must be labeled with a best before date or expiry date.
- (A) for use before microorganisms grow to unsafe levels
 - (B) to ensure the dates are correct for selling
 - (C) to stop microorganisms from growing
 - (D) to help people use the freshest foods first
591. Identify what the label sell-by date means.
- (A) date by which a product should be eaten, based on quality
 - (B) food becomes odorous after this date
 - (C) do not consume product before this date
 - (D) date when retailers should remove product from the store shelf
592. Identify a condition that will inhibit the Maillard reaction.
- (A) alkalinity
 - (B) high pH
 - (C) acidity
 - (D) neutral pH
593. Which of the following pieces of federal legislation sets guidelines for the presentation of information in the material safety data sheet
- (A) the Hazardous Materials Act
 - (B) the Hazardous Products Act
 - (C) the Workplace Hazardous Materials Act
 - (D) the Workers' Compensation Act
594. Halve this ingredient: 1/2 cup sugar.
- (A) 1 cup sugar
 - (B) 1/8 cup sugar
 - (C) 3/4 cup sugar
 - (D) 1/4 cup sugar
595. A key element of a comprehensive safety and health program is one of the following?
- (A) Hazard prevention and control
 - (B) Pre-employment physicals.
 - (C) Drug and alcohol testing.
 - (D) Record keeping.
596. to even off the measurement of an ingredient with a straight edge
- (A) level
 - (B) skewer
 - (C) chill
 - (D) roll

Cook

597. Identify the role of the Legumier.

- (A) junior cook, works under one of the Chefs de Partie
- (B) sauce chef
- (C) vegetable chef
- (D) baker

598. Which item should be rejected during receiving?

- (A) Pork loin vacuum sealed
- (B) Chicken on crushed ice
- (C) Rice in a 25 pound bag
- (D) Water stained bag of flour

599. This has a silicone coating giving it a heat-resistant and nonstick surface, and may be used to line baking sheets or cake molds.

- (A) parchment paper
- (B) wax paper
- (C) cookie sheet
- (D) paper towel

600. A victim of electric shock may likely require what sort of immediate medical attention?

- (A) Ice applied to the burned areas
- (B) Antibiotics to prevent infection
- (C) CPR
- (D) Bandages over the point of electrical contact
- (E) An EEG test to record nervous system function

601. The amount of space an item occupies is called?

- (A) Volume
- (B) Yield
- (C) Measurement
- (D) Weight

602. Which of the following is NOT considered one of "The Big Five" highly infectious food borne illnesses?

- (A) Shigella
- (B) Salmonella
- (C) Hepatitis A
- (D) Listeriosis

Cook

603. Which of the following safety procedures can help prevent burns?
- (A) wear clothing with long loose sleeves
 - (B) open the oven door half way when removing hot food
 - (C) filling containers of hot liquid to the top
 - (D) turn pot/pan handles away from the edge of the stove
604. When during the cooking process is it best to add dairy, such as sour cream, milk or yogurt?
- (A) with all the other ingredients
 - (B) the last 15 minutes
 - (C) the first 15 minutes
 - (D) only when the ingredients have cooled
605. You have only one ceramic cutting board available for food preparation. You have just sliced some chicken breasts for cooking and now need it to prepare a green salad. What should you do to the cutting board before you use it for the salad preparation?
- (A) dry it with a paper towel
 - (B) scrub it using hot, potable water and a detergent, then sanitize
 - (C) rinse it under very hot water
 - (D) turn it over and use the other side
606. To crush food until it becomes smooth. Use a potato masher or fork.
- (A) Mash
 - (B) Scrape
 - (C) Pare
 - (D) Mince
607. The essential part of stock that is a mixture of coarsely chopped onions, carrots, and celery is?
- (A) Aromatics
 - (B) Bouquet garni
 - (C) Mirepoix
 - (D) Sachet d'epices
608. Simple carbohydrates provide you with long lasting energy.
- (A) False
 - (B) True
609. The Canada Food Guide makes food suggestions based on your
- (A) intelligence
 - (B) income
 - (C) location and culture
 - (D) age and gender

Cook

610. Which treatment is effective in individuals with celiac disease?
- (A) lactose free diet (B) anaphylaxis
(C) lactose free diet (D) gluten free diet
611. This type of poultry is a castrated male. It has tender meat containing a high proportion of light meat to dark meat and a relatively high fat content. It is typically four to six months old and usually weights six to ten pounds and is good for roasting. It is usually sold in speciality stores or high end restaurants.
- (A) goose (B) foie gras
(C) fowl (D) capon
612. What is the most effective way to rate employee performance?
- (A) Employee feedback (B) Group evaluation meetings
(C) Question and answer (D) Performance appraisal
613. The transfer of heat from one item to another when the items come into direct contact with each other is?
- (A) Conduction (B) Convection
(C) Sous vide (D) Radiation
614. What does the phrase "may contain" on a food label indicate?
- (A) the food has an ingredient that is listed under an unfamiliar name (B) a small amount of a Big 8 allergen is contained in the food product
(C) an allergen may have accidentally entered the food product during food processing (D) the food product has an ingredient that has changed since the product first came out
615. Define ingredient.
- (A) a top news story (B) an item used in a recipe
(C) a vegetable with green color (D) a person obsessed

Cook

616. Where should raw poultry be placed in a cooler that includes raw and ready to eat food?
- (A) On the top shelf (B) Above the ready-to-eat food
(C) Next to the produce (D) On the bottom shelf
617. Identify the term used to describe harmful bacteria spreading from raw foods to other foods.
- (A) cross-contamination (B) uni-contamination
(C) pseudo-contamination (D) parallel-contamination
618. Which symptom must a food handler report to the person in charge?
- (A) Itching (B) Headache
(C) Dizziness (D) Vomiting
619. What is helpful service tip for addressing the needs of parents with small children?
- (A) Serve children's food in take-out containers (B) Treat the children the same as the adults
(C) Avoid going to the table unless necessary (D) Bring out crayons and paper before service
620. WHICH TYPE OF LODGING IS MOST LIKELY TO RELY ON BUSINESS TRAVELERS AND TYPICAL EXPERIENCES LOW OCCUPANCY RATES ON WEEKENDS?
- (A) INTERNATIONAL AIRPORT (B) DOWNTOWN
(C) ECONOMY SUBURBAN (D) LUXURY RURAL
621. Pan-fry
- (A) To brown very quickly with high heat (B) To cook in a small amount of fat
(C) To brown in a small amount of hot fat, then add a small amount of liquid and cook slowly in a covered pan on the stovetop or in the oven

Cook

622. Identify why an induction cooktop may be safer to use than a radiant heat cooktop.

- (A) induction does not emit eddy currents
- (B) spilled grease will not ignite into flame
- (C) higher noxious combustion by-products
- (D) temperatures are much lower than radiant cooktops

623. Which type of food should take up the most space on your plate?

- (A) fruits and vegetables
- (B) meat
- (C) grains

624. If an operation decides not to train every employee on all allergy policies, the operation should

- (A) refuse to make accommodations for guests with food allergies.
- (B) bring all guests with food allergies to the kitchen to talk to the chef.
- (C) post a sign in the dining area or on the menu warning guests about potential allergens in all food.
- (D) designate an employee as the point of contact to answer all questions.

625. When washing your hands, how long should you scrub with soap?

- (A) 3 to 5 seconds
- (B) 5 to 7 seconds
- (C) 7 to 9 seconds
- (D) 10 to 15 seconds

626. At what temperature should cold TCS food be stored?

- (A) 45
- (B) 41
- (C) 50

627. Salt

- (A) adds flavor to a baked product
- (B) serves as a tenderizing agent in baked products
- (C) hydrates the protein and starch in flour; helps form gluten
- (D) gives structure to a quick bread

628. A can of soft drink/coke contains approximately 10 teaspoons of sugar.

- (A) False
- (B) True

Cook

629. Chinese eating utensils. Use these instead of forks and spoons in China.

- (A) Knives (B) Chopsticks

630. When can a food handler who has a sore throat and a fever return to work with or around food?

- (A) sore throat is gone (B) fever is gone for 24 hours
(C) symptom free for 24 hours (D) written medical release is provided

631. an ingredient that makes a product rise as yeast or baking powder

- (A) leavening agent (B) garnishing
(C) marinate (D) bake or roast

632.

What does the following consumer product symbol indicate?

- (A) The product in the container is poisonous (B) The container is flammable
(C) The product in the container is corrosive (D) The container is explosive

633. To rub food, such as lemon or orange peel, against a grater to obtain fine particles.

- (A) Shred (B) Grind
(C) Grate (D) Sliver

634. To what temperature do you need to reheat beef for a beef sandwich?

- (A) Any temperature (B) 145
(C) 165

Cook

635. Measure 1 teaspoon of lemon juice with:
- (A) liquid measuring cup
 - (B) dry measuring cup
 - (C) measuring spoons
636. A guest with a nut allergy orders a salad. You spot some almonds on the salad. What should you do?
- (A) Pick off the nuts
 - (B) Tell your manager
637. Identify the ideal temperature of ganache when used for pouring over a cake.
- (A) hot
 - (B) lukewarm
 - (C) cold
 - (D) warm
638. a mixture of flour, liquids, and other ingredients thin enough to drop from a spoon
- (A) baste
 - (B) stew
 - (C) braise
 - (D) batter
639. How long can fresh made-potato salad be stored in the cooler?
- (A) One day
 - (B) Seven days
 - (C) Three days
640. What does a POS machine do?
- (A) Compiles feedback from comment cards
 - (B) Sends orders into kitchen from service stations
 - (C) Creates weekly shift and cleaning schedules
 - (D) Lists acceptable substitutions for menu items
641. To cut into very small pieces with a sharp knife.
- (A) Slice
 - (B) Mince
 - (C) Dice
 - (D) Sliver
642. How full should you fill muffin cups with batter before baking?
- (A) 3/4 full
 - (B) 1/3 full
 - (C) 1/2 full
 - (D) to the top

Cook

643. Peanuts, Wheat, Soybeans, and Milk are examples of allergens found in this facility.
- (A) True (B) False
644. Where should cleaning supplies and chemicals be stored?
- (A) In the dry storage room (B) On a shelf next to food
(C) In a designated storage area (D) On a shelf above food
645. A mandolin is used to?
- (A) Sharpen knives (B) Slice precisely
(C) Make a turned cut (D) Hone knives
646. AS PART OF THE FULL-SERVICE SEGMENT, WHICH PROPERTIES CATER TO WEALTHY TRAVELERS AND CORPORATE EXECUTIVES?
- (A) LUXURY (B) ECONOMY
(C) BED AND BREAKFAST (D) ALL-SUITE
647. Bacteria:
- (A) are the cause of all food borne disease. (B) are organisms that need to live inside a hose to survive.
(C) need living cells in order to grow and multiply. (D) refers to invisible, single-celled organisms that often cause disease.
648. How can you determine if a product contains gluten?
- (A) call the manufacturer (B) ask the distributor
(C) look for a gluten-free certification seal (D) all
(E) read the label
649. For people with celiac disease, a gluten reaction can be caused by eating crouton crumbs remaining on a salad.
- (A) False (B) True

Cook

650. A CHOKING PERSON CAN BE HELPED BY THE USE OF?

- (A) FIRST AID
- (B) CPR
- (C) DEFIBRATION
- (D) THE HEMLICH MANEUVER

651. The best way to carry a knife in a kitchen is to hold the blade pointing

- (A) Upward and to your stomach
- (B) Downward and close to your side
- (C) Outward and close to your side
- (D) Inward and above your head

652. Clean up spills immediately.

- (A) True
- (B) False

653. The proper way to unplug an appliance is to pull on the cord firmly to pop the plug from the wall.

- (A) False
- (B) True

654. Which meat is not poultry?

- (A) turkey
- (B) beef
- (C) duck
- (D) chicken

655. Which of the following is NOT a reportable foodborne illness condition?

- (A) Salmonella
- (B) Hepatitis A
- (C) Staphylococcus
- (D) Shigella

656. What should be done if you come home after an eight hour work day and realize you forgot to turn on a meat dish in the crockpot when you left for work in the morning?

- (A) immediately put it in the fridge for the next day
- (B) immediately freeze the food to kill potential bacteria
- (C) throw away the meat but reheat any other food in a skillet
- (D) throw away the food as it has sat in the danger zone for too long

657. A balanced diet should contain the right amounts of all food groups.

- (A) True
- (B) False

Cook

658. Pot handles should be turned inward so they do not extend beyond the edge of the stovetop.
- (A) False (B) True
659. Food handlers should keep their fingernails?
- (A) Long and un polished (B) Long and painted with nail polish
(C) Short an unpolished (D) Short n painted with nail polished
660. Thick soups can be thickened with?
- (A) Cornstarch (B) Compound butter
(C) Cream (D) Bouquet Garni
661. When you stew poultry, you can add carrots, celery, and seasonings for flavor.
- (A) False (B) True
662. WHICH CULINARY ADVANCEMENT CUISINE DID CATHERINE DE MEDICI BRING TO FRANCE
- (A) Classic (B) Noveau
(C) Haute (D) Grand
663. What should you do if you can't finish a meal at a restaurant?
- (A) ask for a take away container to eat the food later (B) leave it as it won't be safe to eat later
(C) wrap it in a napkin to take home (D) leave it, all restaurants donate un-eaten food

Cook

664. Weighing and measuring ingredients accurately is an important part of the preparation process (mise en place). Why?
- (A) It will help produce cakes, pastries and breads that look and taste appropriate and yield the correct portions.
- (B) Correctly calculating measurements increases yield and allows you to accurately portion food later.
- (C) It ensures that the dish is presented the same way every time it's made.
- (D) If ingredients are weighed and measured accurately, you will be able to make the dish faster.
665. Which food should not be handled with bare hands?
- (A) Live shellfish
- (B) Sandwich
- (C) Raw meat
666. Under GHS classification rules, which of the following is a major hazard group?
- (A) Health Hazards
- (B) All of the above
- (C) Physical Hazards
- (D) Environmental Hazards
667. What piece of equipment removes foam from stock or soup and removes solid ingredients from liquids?
- (A) food mill
- (B) funnel
- (C) chinois
- (D) skimmer
668. to remove excess water by using a strainer
- (A) drain
- (B) roll
- (C) braise
- (D) grease
669. This is the second most popular type of poultry and is often cooked during holidays. It contains both light and dark meat with small amounts of fat. Typically the best cooking methods is roast or cut into cutlets and sauteed or pan-fried.
- (A) turkey
- (B) Cornish game hen
- (C) pigeon
- (D) goose

Cook

670. What is the most appropriate cooking method for cabbage and celery
- (A) Steaming (B) Braising
(C) Baking (D) Broiling
671. To cook meat or poultry slowly over coals on a spit or in the oven, basting it often with a highly seasoned sauce.
- (A) Barbecue (B) Steep
(C) Scald (D) Baste
672. A food handler notices cleaning liquid has just been sprayed on the prep table next to some fresh vegetables. This may cause which type of hazard?
- (A) Chemical (B) Environmental
(C) Physical (D) Biological
673. What is the most serious degree of burn?
- (A) Third (B) Second
(C) Fourth (D) First
674. AS PART OF THE FULL-SERVICE SEGMENT, WHICH PROPERTIES CATER TO WEALTHY TRAVELERS AND CORPORATE EXECUTIVES?
- (A) ALL-SUITE (B) ECONOMY
(C) BED AND BREAKFAST (D) LUXURY
675. When scaling a recipe, identify the mathematic formula for finding the conversion factor.
- (A) divide the desired number of servings by 3.14 and multiply by the original number of servings (B) divide the desired number of servings by the original number of servings
(C) multiply the desired number of servings by the original number of servings (D) multiply the original number of servings by the desired number of servings

Cook

676. Identify a mild symptom of a food allergy.

- (A) swelling of the tongue and throat
- (B) hives, itching or skin rash
- (C) rapid, irregular pulse
- (D) loss of consciousness

677. This chef makes the pastries and desserts. Oversees the boulanger.

- (A) Pâtissier
- (B) Saucier
- (C) Rotissier
- (D) Sous-Chef

678. Identify the role of the Poissonier.

- (A) soup cook
- (B) vegetable chef
- (C) fish cook
- (D) grill cook

679. Where should staff members eat, drink, smoke, or chew gum?

- (A) in dishwashing areas
- (B) outside the kitchen door
- (C) where customers eat
- (D) in designated areas

680. To rub food over a food grater to break it up into small pieces.

- (A) Cube
- (B) Slice
- (C) Grate
- (D) Pare

681. For which task is it necessary to wear gloves?

- (A) handling raw foods that will not be cooked
- (B) all of the time except not when handling raw vegetables for salad
- (C) handling all types of food
- (D) handling raw foods that will be cooked

682. How many measures of $\frac{1}{8}$ cups will fill 1 cup?

- (A) 12
- (B) 4
- (C) 10
- (D) 8

Cook

683. Facial expressions are examples of what type of ----- communication?
- (A) Organizational (B) Verbal
(C) Interpersonal (D) Non verbal
684. Hot drink with espresso and frothed hot milk.
- (A) Cappucino (B) Espresso
(C) Antipasto (D) Prosciutto
685. An electrical fire can be safely put out with water.
- (A) False (B) True
686. Facial expressions are examples of what type of ----- communication?
- (A) Interpersonal (B) Verbal
(C) Organizational (D) Non verbal
687. One of the best ways to prevent food poisoning is to...
- (A) wash your hands with water before you start cooking (B) lick the spoon clean when baking
(C) wash your hands with soap and water after you've started cooking (D) wash your hands with soap and water before you start cooking
688. Scaffolding erected this much feet above the ground must have guard rails?
- (A) 10 ft (B) 5 ft
(C) 3 ft (D) 8 ft
689. According to the Canada Food Guide, which answer represents one serving of an apple in the fruit category?
- (A) golf ball (B) eraser
(C) large marble (D) light bulb
690. High-fat food is usually high in calories.
- (A) False (B) True

Cook

691. Grape must oxidizes by an enzymatic pathway and finished wine oxidizes chemically.
☐ (A) False ☐ (B) True
692. Grade B and C birds are usually used in processed products.
☐ (A) False ☐ (B) True
693. To cook slowly and for a long time in liquid.
☐ (A) Broil ☐ (B) Roast
☐ (C) Stew ☐ (D) Brown
694. to coat a utensil lightly with fat, oil or butter to prevent sticking
☐ (A) bread ☐ (B) grease
☐ (C) cream ☐ (D) grate
695. This is an altered reaction to a specific food that does not involve the immune system.
☐ (A) allergens ☐ (B) intolerance
☐ (C) allergies ☐ (D) symptoms
696. Which answer represents one serving of meat/alternative according to the Canada Food Guide?
☐ (A) 500 ml legumes ☐ (B) 125 ml peanut butter
☐ (C) 1/2 cup chicken or lean meat ☐ (D) 3 eggs
697. To brown by direct heat in a toaster or in the oven.
☐ (A) brown ☐ (B) scald
☐ (C) fry ☐ (D) toast

Cook

698. What are two ways that job descriptions can be used?
- (A) to point out where an employee needs improvement and critique their work
 - (B) they can explain what the job will entail and they can be used to evaluate job performance
 - (C) to praise an employee for a job well done and give them a raise in pay
 - (D) the process of making an employee familiar with the food service operation
699. _____ can cause food poisoning and toxic shock syndrome
- (A) Cocci
 - (B) None
 - (C) Staphylococci
 - (D) Bacilli
700. To open pressure fryer lid carefully, which of the following actions should be taken?
- (A) Press down on cross bar with one hand while lifting latch by red ball with other hand
 - (B) Rest lid gently against back of fryer
 - (C) All
 - (D) Open lid, supporting it as it rises
701. After the stock has been stored, it must be degreased before it can be used. This is because?
- (A) The grease will ruin the flavor of the stock, turning it rancid
 - (B) It is easier to heat up degreased stock
 - (C) All of the fat must be skimmed off in order for the stock to be healthful
 - (D) Degreasing makes the stock clearer and purer, while removing some of the fat
702. Which area on a general safety audit covers such items as tile and carpet?
- (A) management practices
 - (B) equipment
 - (C) employee practices
 - (D) facilities
703. Which food should be rejected during receiving?
- (A) Turkey at 137
 - (B) Shrimp with ice crystals
 - (C) Oranges with a strong citrus scent
 - (D) Chicken breast at 40

Cook

704. Identify the correct conversion factor when scaling a recipe up from four servings to ten servings.
- (A) 4.0 (B) 40
(C) 2.5 (D) 0.4
705. This hand held tool is used to smoothly blend ingredients, fold ingredients together, or whip cream.
- (A) kitchen stand mixer (B) rubber spatula
(C) dessert fork (D) whisk
706. Which symptom must a food handler report to the person in charge?
- (A) Headache (B) Itching
(C) Vomiting (D) Dizziness
707. Slurry, a liaison, and a roux are all considered to be?
- (A) Stocks (B) Soups
(C) Aromatics (D) Thickeners
708. A written summary of candidate's experience, skills, and achievements that relate to the job being sought is called a?
- (A) Cover letter (B) Resume
(C) Portfolio (D) Career plan
709. Shock is defined as an abnormal condition of the body where:
- (A) The heart stops beating normally, and "quivers" instead (B) The lungs are unable to process oxygen properly
(C) There is insufficient blood delivered to the body's cells (D) The muscles in the body have "frozen" and will not move
(E) A broken bone has penetrated the skin

Cook

710. Which group of individuals has a higher risk of foodborne illness?
- (A) vegetarians (B) elderly people
(C) teenagers (D) women
711. To set the oven to cooking temperature in advance, so that it has time to reach the desired temperature by the start of cooking.
- (A) Bake (B) Broil
(C) Preheat (D) Simmer
712. Which is the best guideline to follow when washing your hands before preparing food?
- (A) Using just hot water is enough. (B) Use soap and water.
(C) Wash for as long as it takes to sing
The 12 Days of Christmas.
713. The process that an operation uses to integrate new employees into an organization is called?
- (A) On boarding (B) Training
(C) Training (D) Orientation
714. to remove center seed section of fruit
- (A) score (B) cube
(C) core (D) cool
715. The stick and water displacement methods are use to measure?
- (A) SOLID FATS (B) LIQUIDS
(C) SIFTED INGREDIENTS (D) DRY INGREDIENTS
716. If you drop a knife, you should try and catch it before it hits the floor.
- (A) False (B) True

Cook

717. When using a wrench, the safest and most efficient way to use it is by?
- (A) put a pipe on end and push
 - (B) can be used as a hammer
 - (C) pulling towards you
 - (D) pushing away from you
718. Which item should be rejected during receiving?
- (A) Water stained bag of flour
 - (B) Pork loin vacuum sealed
 - (C) Rice in a 25 pound bag
 - (D) Chicken on crushed ice
719. Why is the flour and leavening agent sifted when making a butter cake?
- (A) removes lumps and makes flour more dense
 - (B) activates the leavener
 - (C) warms the flour and leavener
 - (D) removes lumps and fluffs up flour slightly
720. To pour or brush a liquid over food while it cooks.
- (A) Marinate
 - (B) Saute
 - (C) Beat
 - (D) Baste
721. To cook in an oven.
- (A) Bake
 - (B) Saute
 - (C) Boil
 - (D) Simmer
722. What is the difference between WHMIS education and WHMIS training
- (A) Education is shorter while training is longer.
 - (B) Education involves systematic instruction
 - (C) Training is more focused on application.
 - (D) Training takes place on the job
723. BOULANGER AFFECTED THE GROWTH OF THE FOOD SERVICE INDUSTRY BY
- (A) DEVELOPING PASTEURIZATION
 - (B) OPENING THE FIRST CAFÉ
 - (C) OPENING THE FIRST RESTURANT
 - (D) INVENTING THE COOKING GUILDS

Cook

724. Small tender cuts of beef are called:
- (A) Rounds (B) Bits
(C) Chops (D) Medallions
725. The process of storing vacuum-packed meats under refrigeration for up to six weeks is called
- (A) dry aging (B) wet aging
726. What does the menu mark showing a milk carton with a line through it indicate?
- (A) the item is not a good source of calcium (B) the item does not pose a food safety concern
(C) the item does not contain milk ingredients (D) the item is not suitable for breakfast use
727. Pests can do which two types of damage?
- (A) Chemical and nutritional (B) Physical and biological
(C) Biological and chemical (D) Nutritional and physical
728. Milk, cheese, and eggs contain protein.
- (A) True (B) False
729. If oil in a pan catches on fire, your best option is to
- (A) move the pan. (B) put baking soda on it.
(C) throw water on it. (D) smother it with a lid.
730. A thick tea towel is safe to use to pick up a hot baking pan.
- (A) True (B) False
731. What is the first thing you should do before you start working with food?
- (A) measure ingredients (B) wash your hands
(C) preheat the oven (D) clean the kitchen

Cook

732. After how many hours of constant use must a food-contact surface be cleaned and sanitized

- (A) 1
- (B) 4
- (C) 2
- (D) 3

733. Which of these is not a grain or cereal?

- (A) almonds
- (B) rice
- (C) wheat
- (D) oats

734. When is it acceptable to eat in an operation?

- (A) When preparing food
- (B) When sitting in a break area
- (C) When handling utensils
- (D) When washing dishes

735. This person is an apprentice chef learning under a station chef.

- (A) boulanger
- (B) sous-chef
- (C) patissier
- (D) commis

736. The chemical process that occurs when oxygen in the air comes in contact with the flesh of cut fruit and turns brown is called

- (A) Glazing
- (B) Enzymatic browning
- (C) Caramelizing
- (D) Seeding

737. steam

- (A) slice,shred, or julienne
- (B) sterilize
- (C) pan-fry or saute
- (D) pare or peel

738. What type of question can be answered with a simple yes or no?

- (A) Open-ended
- (B) Categorical
- (C) Closed
- (D) Multiple-choice

739. The body does not store fat-soluble vitamins.

- (A) True
- (B) False

Cook

740. How high should the oil be in a deep fryer?
- (A) Enough to cover the food (B) Nine inches deep
(C) To the outer lip (D) To the fill line
741. A SAFETY INSPECTION OF AN OPERATIONS FACILITY, EQUIPMENT, EMPLOYEE PRACTICES, AND MANGEMENT PRACTICES IS CALLED?
- (A) GENERAL SAFETY (B) MATERIAL SAFETY PLAN
(C) ACCIDENT INVESTIGATION (D) EMERGENCY PLAN
742. How many 1/4 cups is needed to fill 1 cup?
- (A) 2 and 1/4 cup (B) 2
(C) 4 (D) 3
743. One of the common signs of a heart attack is:
- (A) A sharp pain in the lower area of the spine (B) A general feeling of restlessness and anxiety
(C) Discomfort in the chest and/or upper body (D) Loss of bowel control
(E) A feeling of numbness in the legs
744. What is cross-contact?
- (A) When cutting chicken and veggies on the same cutting board (B) When pathogens are transferred from one surface or food to another
(C) When a food item containing an allergen comes in contact with another food
745. A helmet for the technical rescuer should include which of the following:
- (A) Certification from appropriate agency (B) Chin strap
(C) Three-point suspension system (D) All
746. A mixture of flour and melted butter or oil used to thicken liquids.
- (A) Jus (B) Roux

Cook

747. to cook food in a basket inside a covered pan with a small amount of boiling water

- ☐ (A) cream
- ☐ (B) sear
- ☐ (C) steam
- ☐ (D) stew

748. Using a sanitizing spray to clean inside a walk-in refrigerator is an example of:

- ☐ (A) Biological contamination
- ☐ (B) Chemical contamination
- ☐ (C) None
- ☐ (D) Physical contamination

749. How should a perfectly mixed muffin batter look?

- ☐ (A) smooth with one or two lumps
- ☐ (B) smooth with no lumps
- ☐ (C) lumpy with a few flour pockets
- ☐ (D) lumpy and thick

750. What food safety practice can prevent cross-contact?

- ☐ (A) purchasing food from approved, reputable suppliers
- ☐ (B) washing, rinsing, and sanitizing utensils before each use
- ☐ (C) using only food-grade equipment
- ☐ (D) using seasonal foods

751. Of all the microorganisms, bacteria are the greatest threat to food safety.

- ☐ (A) True
- ☐ (B) False

752. A convection oven _____.

- ☐ (A) cooks faster than a microwave oven.
- ☐ (B) cooks exactly the same as a conventional oven.
- ☐ (C) is the only part of a range.
- ☐ (D) uses a fan to help circulate the heat.

753. Vitamins provide energy.

- ☐ (A) True
- ☐ (B) False

754. to make a mixture soft and smooth

- ☐ (A) bread
- ☐ (B) grease
- ☐ (C) core
- ☐ (D) cream

Cook

755. The variation of a language spoken by a particular group of people is called?
- (A) Accent (B) Jargon
(C) Dialect (D) Semantics
756. What should be used to scoop ice from an ice bin?
- (A) Bare hands (B) A glass
(C) A pitcher (D) Ice scoop
757. The two types of vitamins are fat soluble and water soluble.
- (A) False (B) True
758. After how many hours of constant use must a food-contact surface be cleaned and sanitized
- (A) 3 (B) 1
(C) 2 (D) 4
759. Spread made from mashed avocado, tomato, and onion.
- (A) Salsa (B) Guacamole
760. When baking with yeast, it requires time to ferment.
- (A) True (B) False
761. To make the surface of a food brown in color by frying, broiling, baking in the oven, or toasting.
- (A) Fry (B) Pan-broil
(C) Sear (D) Brown
762. What is mirepoix?
- (A) blended vegetable reduction (B) fresh green herb
(C) a seasoning blend (D) liver pate

Cook

763. To heat a liquid to just below the boiling point; or to pour boiling water over food or to dip food briefly into boiling water.

- (A) Scald
- (B) Poach
- (C) Broil
- (D) Boil

764. Cross-contamination is most likely to occur when foods are not properly ____ .

- (A) chilled
- (B) cooked
- (C) cleaned
- (D) separated

765. For a teenager, what is the range of grain servings a day suggested in the Canada Food Guide?

- (A) 3-4
- (B) 1-4
- (C) 6-7
- (D) 8-10

766. Identify which option will not thicken a liquid.

- (A) cream of tartar
- (B) potato starch
- (C) cornstarch
- (D) flour

767. Double this ingredient: 1/8 tsp pepper.

- (A) 1/4 tsp pepper
- (B) 1 tsp pepper
- (C) 1/16 tsp pepper
- (D) 1/2 cup pepper

768. When checking boiling food in a pot, always lift lid from the back first so steam travels away from you.

- (A) True
- (B) False

769. In top-to-bottom order, how should a fresh beef roast, fresh halibut, lettuce, and a pan of ground chicken be stored?

- (A) lettuce, fresh beef roast, ground chicken, fresh halibut
- (B) fresh halibut, fresh beef roast, ground chicken, lettuce
- (C) fresh halibut, lettuce, ground chicken, fresh beef roast
- (D) lettuce, fresh halibut, fresh beef roast, ground chicken

Cook

770. When rivals restaurants share similar menus and food quality, a competitive advantage can most easily be gained through?
- (A) Creating a unique menu (B) Moving to better location
- (C) Improving customer service (D) Underselling other operations
771. A helmet in the high angle environment does all of the following except:
- (A) Decrease the risk of severe brain injury (B) Decrease the risk of significant skull fracture
772. What is the percentage of males to females in the profession of a chef?
- (A) male 20% female 70% (B) male 60% female 40%
- (C) male 19% female 85% (D) male 77% female 19%
773. Identify the correct conversion factor when scaling a recipe down from four servings to two servings.
- (A) 0.5 (B) 50
- (C) 0.1 (D) 5
774. When scaling a recipe up from two servings to four servings, what will be the new measure for the original 1 cup (250 ml) of flour?
- (A) 4 cups (1000 ml) (B) 1/2 cup (125 ml)
- (C) 2 cups (500 ml) (D) 1/4 cup (60 ml)
775. Identify the weakness of cooking food on a cook top using electric or gas heat.
- (A) only directly heats the part of the cookware that it touches (B) electric and gas heat are expensive
- (C) electric and gas heat cook food throughout the cooking vessel at the same temperature (D) rapidly dispenses heat throughout the cooking vessel
776. Which of the following cooking methods is suited for the leg meat of poultry?
- (A) Simmering (B) Roasting
- (C) Braising (D) All

Cook

777. First in , first out (fifo) is a method of

- | | |
|--|--|
| ☐ (A) STOCK ROTATION | ☐ (B) RECORD KEEPING |
| ☐ (C) TEMPERTURE CONTROL | ☐ (D) PEST CONTROL |

778. The number of calories one needs each day is called the ____ .

- | | |
|---|---|
| ☐ (A) calorie requirement | ☐ (B) nutritional requirement |
| ☐ (C) calorie intake | ☐ (D) nutrient requirement |

779. To cut into small pieces.

- | | |
|---------------------------------|--------------------------------|
| ☐ (A) Slice | ☐ (B) Chop |
| ☐ (C) Mince | ☐ (D) Cut |

780. Identify the role of the Executive Chef.

- | | |
|--|---|
| ☐ (A) manager of the entire food service operation | ☐ (B) communicates between front of house and kitchen, makes sure meals are placed properly |
| ☐ (C) in charge of prepared meats dishes | ☐ (D) pastry chef |

781. to sprinkle food with flour and then remove excess

- | | |
|---------------------------------|---------------------------------|
| ☐ (A) boil | ☐ (B) roll |
| ☐ (C) flour | ☐ (D) glaze |

782. To cover with boiling water and let stand without additional heating until flavor and color are extracted, as for tea.

- | | |
|---------------------------------|----------------------------------|
| ☐ (A) saute | ☐ (B) steep |
| ☐ (C) steam | ☐ (D) simmer |

783. to coat a food with syrup or jelly and then heat or chill

- | | |
|----------------------------------|---------------------------------|
| ☐ (A) grease | ☐ (B) grate |
| ☐ (C) glaze | ☐ (D) flour |

Cook

784. Announce to cooking partners when you are going to open the oven or move hot liquids.

- (A) False (B) True

785. What should a server do shortly after a guest with a food allergy has been served an allergen special order meal?

- (A) refill the guests beverage (B) check with the guest to see if the meal is acceptable
(C) watch the guest eat the meal to see if he or she has a reaction (D) review the operations food allergy policies with the guest

786. Identify the option that is not a variety of roux.

- (A) white (B) blond
(C) cream (D) brown

787. Thick soups can be thickened with?

- (A) Bouquet Garni (B) Compound butter
(C) Cream (D) Cornstarch

788. How should food handlers keep their fingernails?

- (A) Short and unpolished (B) Long and unpolished
(C) Long and polished (D) Short and polished

789. How can you protect ready-to-eat food when handling it?

- (A) Use deli sheets (B) Wear gloves
(C) All (D) Use tongs or other utensils

790. Heat detectors are active by a significant?

- (A) Increased in temperature (B) increase in oxygen
(C) Decreased in temperature (D) Decreased in oxygen

791. Béchamel, veloute, and hollandaise are called?

- (A) Grand sauces (B) Compound butters
(C) Thickeners (D) Derivative sauces

Cook

792. The white breast meat of poultry - specifically chickens and turkeys - should only be cooked to medium to prevent it from drying out

- (A) True (B) False

793. Milk should be pasteurized before you drink it.

- (A) True (B) False

794. Cuts shortening into flour when making biscuits and pastry.

- (A) rubber spatula (B) sifter
(C) whisk (D) pastry blender

795. to fasten meat with pins to hold desired shape while cooking

- (A) skewer (B) simmer
(C) stew (D) sear

796. To measure the temperature of equipment surface, use

- (A) Thermocouple (B) Thermistor
(C) Infrared thermometer (D) Bimetallic stemmed thermometer

797. Quality customer service will most likely result in?

- (A) Better customer loyalty (B) Lower payroll
(C) Increased marketing costs (D) Higher turnover

798. To mix with an over & over motion, using a spoon or a rotary or electric beater.

- (A) Beat (B) Knead
(C) Cream (D) Whip

799. What level of job includes planning menus, develop recipes, and managing a restaurant and foodservice operation?

- (A) Higher level (B) Mentor
(C) Entry-level (D) Apprentice

Cook

800. What type of training would you use if you needed to teach a new employee how to prepare menu items?
- (A) Role-playing (B) Group-training
(C) On-the-job training (D) Cross-training
801. What must a food handler with a hand wound do to safely work with food?
- (A) bandage the wound with an impermeable cover and wear a single-use glove (B) apply iodine solution and a permeable bandage
(C) bandage the wound and avoid contact with food for the rest of the shift (D) wash the wound and wear a single-use glove
802. What does a POS machine do?
- (A) Creates weekly shift and cleaning schedules (B) Compiles feedback from comment cards
(C) Lists acceptable substitutions for menu items (D) Sends orders into kitchen from service stations
803. To work dough by folding, pressing, and turning, until it is smooth and elastic. Place dough on a floured board, fold it in half, and press firmly with the heels of your hands. Turn the dough about a quarter turn, and repeat the folding and pressing.
- (A) Fold In (B) Whip
(C) Cut In (D) Knead
804. Where should raw poultry be placed in a cooler that includes raw and ready to eat food?
- (A) Next to the produce (B) On the top shelf
(C) On the bottom shelf (D) Above the ready-to-eat food
805. To cook meat quickly at a high temperature until it becomes brown. Use a skillet with a small amount of fat, or the oven at a high temperature
- (A) Pan-fry (B) Toast
(C) Saute (D) Sear

Cook

806. To cook by dry heat, uncovered, usually in the oven.

- (A) broil
- (B) roast
- (C) stew
- (D) saute

807. Which of the following is not a reason you should eat?

- (A) To satisfy your appetite
- (B) To reduce stress
- (C) To gain energy
- (D) To meet your nutritional needs

808. Poultry wings benefit from moist-heat cooking only.

- (A) True
- (B) False

809. To fry small pieces of food very quickly in a small amount of very hot oil while stirring constantly. Use a wok or skillet.

- (A) Fry
- (B) Stir-fry
- (C) Pan-fry
- (D) Saute

810. What the law says you should have:

- (A) Drivers' License
- (B) Right
- (C) all
- (D) Hazard

811. Appetite is a feeling of physical discomfort that is caused by your body's need for nutrients.

- (A) True
- (B) False

812. What type of fire extinguisher should be used on electrical fires?

- (A) class C
- (B) class D
- (C) class B
- (D) class A

813. Which part of the plant is a potato?

- (A) bud
- (B) flower
- (C) stem
- (D) root

Cook

814. to cook in liquid that is bubbling and steaming

- (A) core
- (B) roll
- (C) cool
- (D) boil

815. To check the temperature of food, place your thermometer

- (A) In the thickest part
- (B) On the bottom surface
- (C) In the thinnest part
- (D) On the top surface

816. Choose the appropriate snack mix for someone allergic to tree nuts.

- (A) croutons, pistachios, cranberries
- (B) pecans, dried blueberries, cheerios
- (C) raisins, cashews, coconut flakes
- (D) banana chips, raisins, cheerios

817. At what temperature does water boil?

- (A) 250 degrees F
- (B) 100 degrees F
- (C) 180 degrees F
- (D) 212 degrees F

818. To cut food into long, thin strips.

- (A) Sliver
- (B) Shred
- (C) Trim
- (D) Julienne

819.

- (A) corer
- (B) V cut knife
- (C) melon scoop
- (D) apple slicer corer

820. To retain heat, only open the oven door part way to remove food.

- (A) False
- (B) True

Cook

821. Heat detectors are active by a significant?
- (A) increase in oxygen (B) Decreased in temperature
(C) Decreased in oxygen (D) Increased in temperature
822. The term al dente describes pasta that is _____ to the bite?
- (A) Firm (B) Mushy
(C) Soft (D) Crisp
823. Place the fractions in order from smallest to largest: $\frac{3}{4}$, $\frac{1}{2}$, $\frac{3}{8}$, $\frac{1}{3}$
- (A) $\frac{3}{4}$, $\frac{1}{2}$, $\frac{3}{8}$, $\frac{1}{3}$ (B) $\frac{1}{3}$, $\frac{1}{2}$, $\frac{3}{8}$, $\frac{3}{4}$
(C) $\frac{3}{4}$, $\frac{3}{8}$, $\frac{1}{3}$, $\frac{1}{2}$ (D) $\frac{1}{3}$, $\frac{3}{8}$, $\frac{1}{2}$, $\frac{3}{4}$
824. In the 20th century, who named the five mother sauces of French cuisine?
- (A) Paul Bocuse (B) Julia Child
(C) Auguste Escoffier (D) Jacques Pepin
825. What are the minimum requirements for the Maillard reaction to occur?
- (A) reducing heat (B) reducing water and sugar
(C) reducing protein and sugar (D) reducing water
826. What does a federal law passed in 2004 require of food labels?
- (A) indicate whether the product is gluten free (B) be flagged if a product ingredients change
(C) use color coding to identify allergens (D) clearly identify Big 8 allergens on the ingredient list
827. The form of cooking in which a vegetable is quickly and partially cooked in hot water is known as
- (A) Poaching (B) Blanching
(C) Sous vide (D) Parboiling

Cook

828. A SERVICE OR PRODUCT PROVIDED TO GUESTS FOR THEIR CONVENIENCE, EITHER WITH OR WITHOUT AN ADDITIONAL FEE, IS A(N)

- (A) DONATION
- (B) ENDOWMENT
- (C) AMENITY
- (D) CATERING SERVICE

829. What type of toxin is ciguatera toxin?

- (A) Biological
- (B) Bacterial
- (C) Microbial
- (D) Physical

830. Where should cleaning supplies and chemicals be stored?

- (A) On a shelf above food
- (B) In a designated storage area
- (C) On a shelf next to food
- (D) In the dry storage room

831. What is the correct way to cover an infected wound?

- (A) With a glove and a bandage
- (B) With a bandage
- (C) With a glove

832. A cutting board must be set aside and shown to a manager when it is

- (A) Faded in color
- (B) Chipped or cracked
- (C) Used for a different food
- (D) Used for longer than 6 months

833. Which food should not be handled with bare hands?

- (A) Raw meat
- (B) Live shellfish
- (C) Sandwich

834. Identify the role of the Aboyeur.

- (A) in charge of cold food preparation and in charge of the pantry
- (B) communicates between front of house and kitchen, makes sure meals are placed properly
- (C) ice-cream cook
- (D) fish cook

Cook

835. An oxygen deficient atmosphere contains:
- (A) less than 16% oxygen
 - (B) less than 22% oxygen
 - (C) less than 19.5% oxygen
 - (D) less than 23% oxygen
836. What does FIFO stand for?
- (A) Food-In, Food-Out
 - (B) First-In, First-Out
837. The proper cutting motion is to cut
- (A) away from your body.
 - (B) to the left of your body.
 - (C) towards your body.
 - (D) to the right of your body.
838. What are two factors that determine the quantities of ingredients required to prepare a dish?
- (A) The standard recipe and any dietary variations required.
 - (B) The standard recipe and number of portions required.
 - (C) The preparation list and ingredients list.
 - (D) The number of portions and a list of menu items.
839. What must be done before washing items in a dishwasher?
- (A) Air-dry the items
 - (B) Wash the items
 - (C) Scrape, rinse, or soak the items
 - (D) Sainitize the items
840. What are the two types of WHMIS label
- (A) supplier and manufactured label
 - (B) consumer and manufactured label
 - (C) consumer and workplace label
 - (D) supplier and workplace label
841. To cut food into flat pieces.
- (A) sliver
 - (B) cut
 - (C) slice
 - (D) chop
842. Chili peppers, avocados and squash are what type of vegetables
- (A) Flower
 - (B) Fruit
 - (C) Tuber
 - (D) Seed

Cook

843. To what temperature do you need to reheat beef for a beef sandwich?

- (A) 145
- (B) Any temperature
- (C) 165

844. The most difficult and expensive kind of French cooking.

- (A) Haute Cuisine
- (B) New Age Cuisine
- (C) Nouvelle Cuisine
- (D) Thai Cuisine

845. To cook meat with dry and moist heat

- (A) sauteing
- (B) simmering
- (C) braising
- (D) convectioning

846. A _____ can bake, broil and toast breads or other small foods without heating the entire kitchen.

- (A) broiling rack skillet.
- (B) toaster pot.
- (C) toaster oven.
- (D) electric skillet.

847. The condition in which you spend your work day:

- (A) Right
- (B) Working Conditions
- (C) Workers' Compensation
- (D) Sleeping

848. to mix with a circular motion, using a spoon or fork

- (A) steam
- (B) sear
- (C) stir
- (D) stew

849. flatten to desired thickness by using rolling pin

- (A) roll
- (B) toss
- (C) boil
- (D) cool

Cook

850. Induction cooktops were originally designed to use in which space?
- (A) outdoor cookware (B) industrial and restaurant kitchens
(C) spaces without access to gas (D) spaces without access to electricity
851. To combine two or more ingredients, usually by stirring.
- (A) Beat (B) Mix
(C) Stir (D) Combine
852. What is helpful service tip for addressing the needs of parents with small children?
- (A) Bring out crayons and paper before service (B) Serve children's food in take-out containers
(C) Avoid going to the table unless necessary (D) Treat the children the same as the adults
853. Minerals build strong, hard bones and ____.
- (A) eyes (B) hair
(C) muscles (D) teeth
854. How many measures of $\frac{1}{8}$ cups to fill $1\frac{1}{2}$ cups?
- (A) 4 (B) 12
(C) 10 (D) 16
855. The stick and water displacement methods are use to measure?
- (A) LIQUIDS (B) DRY INGREDIENTS
(C) SOLID FATS (D) SIFTED INGREDIENTS
856. A mortar and pestle is not used to crush dried herbs and spices.
- (A) False (B) True
857. These smoke-dried jalapeños are used to flavor salsas and marinades.
- (A) poblanos (B) chipotles
(C) avocados (D) crema

Cook

858. This part of the egg anatomy provides a protective barrier against bacteria.
- (A) germinal disc
 - (B) albumen
 - (C) air cell
 - (D) inner and outer membranes
859. An operation ensures that the exterior of the facility is spotless and well-kept, and the staff frequently rehearses the restaurants greeting script. What is the most likely outcome of this operations effort?
- (A) Staff turnover will increased due to script requirements
 - (B) Table service will become slower but more through
 - (C) Profits will decrease because of costs to maintain the exterior of facility
 - (D) Customers will have a positive first impression of the operation
860. Chardonnay is produced in a narrow range of wine styles.
- (A) False
 - (B) True
861. What is the ideal way kitchen clothing should fit?
- (A) baggy fitting
 - (B) close fitting
 - (C) loose fitting
 - (D) tight fitting
862. How quickly does an induction cooktop cool after a pot or pan is removed from a burner?
- (A) 1 minute
 - (B) 30 seconds
 - (C) 2 minutes
 - (D) immediately
863. What are two things a manager must consider when determining the work schedule?
- (A) resources available and leadership
 - (B) work schedules and customer relations
 - (C) prior experience and employee availability
 - (D) purchasing procedures and menu costs
864. What should you do if you discover a food service worker has AIDS?
- (A) release the worker from work until cleared by upper management
 - (B) restrict that worker to non-food preparation duties
 - (C) allow to work unless they have a secondary communicable disease
 - (D) release the worker from work until cleared by a medical doctor

Cook

865. What type of flavoring contains barley and can be hidden in processed foods?
- (A) MSG (B) vanilla
(C) malt (D) sodium nitrate
866. Nutrients that are made by living things that assist many chemical reactions in the body are
- (A) electrolytes (B) minerals
(C) vitamins (D) antioxidants
867. Identify the role of the Boucher.
- (A) roasts and braises meats (B) junior cook, works under one of the Chefs de Partie
(C) in charge of prepared meats dishes (D) butcher
868. Identifying with another person's feeling or thoughts is called?
- (A) Sympathy (B) Esteem
(C) Respect (D) Empathy
869. to cook slowly in a small quantity of liquid to a long time
- (A) stew (B) baste
(C) sear (D) stir
870. A protein found in milk is
- (A) true moo (B) albumen
(C) casein (D) protoplasm
871. Barbecue
- (A) To cook by direct heat, usually in broiler or over coals (B) To roast meat slowly on a spit or on a rack over hot coals
(C) none (D) To cook meat by dry heat, usually in the oven

Cook

872. A paring knife with a curved blade makes cutting rounded surfaces easier is known as a(n)
- (A) Boning knife (B) Scimitar
(C) Chef's knife (D) Tourne'
873. How should food be labeled if stored out of its original container?
- (A) Date and temperatures at the time of storage (B) Food handlers name and title
(C) Contents and dates (D) Food handlers name and date
874. An employee expressed her concerns to her supervisor that fumes emitting from her computer were causing her headaches. She requested the supervisor's permission to stop working immediately. However, the supervisor insisted that she continue working. What employee right did the supervisor's behaviour violate
- (A) the employee's right to report unsafe condition (B) the employee's right to refuse unsafe work
(C) the employee's right to a safe workplace (D) the employee's right to participate in health and safety programs
875. Wireless headphones are acceptable in the kitchen because there are no cords to cause a safety hazard.
- (A) True (B) False
876. What is the best way for an employee to inform an employer's that he or she is resigning?
- (A) Walk into the employer's office to say goodbye (B) Write a letter of resignation listing the reason for leaving
(C) Leave a message for the employer with a two week notice (D) Write a thank you note to the employer for the experience
877. The mineral potassium is NOT found in which food source?
- (A) milk (B) chicken
(C) banana (D) egg

Cook

878. In order to wash hands correctly, what is the first thing a food handler must do?
- (A) wet hands and arms
 - (B) apply soap
 - (C) scrub hands and arms vigorously
 - (D) use a single-use paper towel to dry hands
879. Eating foods from each food group is not important.
- (A) True
 - (B) False
880. At what temperature should cold TCS food be stored?
- (A) 45
 - (B) 50
 - (C) 41
881. Identify the proper word for sheep meat.
- (A) lork
 - (B) beef
 - (C) lamb
 - (D) poultry
882. Which of the following WHMIS requirements must employers follow
- (A) Ensure the hiring of only those candidates who have MSDS and WHMIS training.
 - (B) Ensure MSDSs are onsite for all controlled products and all controlled products are properly labelled
 - (C) Ensure MSDSs are written in either English or French depending on province
 - (D) Ensure MSDS labels are attached to all hazardous material containers
883. To cook in an uncovered skillet with a small amount of fat.
- (A) Deep-fat Fry
 - (B) Stir-fry
 - (C) Pan-broil
 - (D) Pan-fry
884. Which answer represents one serving of milk/alternative according to the Canada Food Guide?
- (A) 250 ml
 - (B) there is no limit on milk/alternative
 - (C) 125 ml
 - (D) 2 cups

Cook

885. to coat food with fine bread crumbs, flour before cooking
- (A) bread (B) cream
(C) grease (D) knead
886. Roasting bones to enhance the flavor and color of stock is a process known as?
- (A) Par-boiling (B) Sweating
(C) Blanching (D) Browning
887. Ambient yeast strains are not always robust enough to ferment a wine to dryness.
- (A) True (B) False
888. Health hazards such as impure air and improper storage and use of food fall under the category of:
- (A) personal hygiene (B) oral hygiene
(C) public hygiene (D) personal grooming
889. Thawing raw chicken breasts in a pan on a prep table is an example of
- (A) Time-temperature abuse (B) Poor personal hygiene
(C) Poor cleaning and sanitizing (D) Cross-contamination
890. According to the Canada Food Guide, which answer represents one serving of raw leafy vegetables?
- (A) 1 cup (B) 1/2 cup
(C) 2 cups (D) 1 pound
891. To cook uncovered in an ungreased or lightly greased skillet, pouring off excess fat as it accumulates.
- (A) Saute (B) Steam
(C) Pan-broil (D) Broil

Cook

892. To prevent food allergens from being transferred to food
- (A) Buy food from an approved, reputable supplier
 - (B) Avoid pewter tableware and copper cook ware
 - (C) Clean and sanitize utensils before use
 - (D) Store cold food at 41 f or lower
893. To tear or cut into thin pieces or strips.
- (A) Slice
 - (B) Shred
 - (C) Grate
 - (D) Mash
894. Chowder is a rich soup that contains chunks of food.
- (A) False
 - (B) True
895. Fats provide the most concentrated form of
- (A) energy
 - (B) oxygen
 - (C) carbon
 - (D) lipase
896. PASTEURIZATION IS THE PROCESS OF
- (A) CANNING FOODS TO KEEP THEM FRESH AND SAFE TO EAT
 - (B) HEATING MILK TO REMOVE HARMFUL BACTERIA
 - (C) CLEANING COOKING UTENSILS TO MAKE SURE THEY ARE SAFE AND SANITARY
 - (D) BOILING WATER TO ELIMINATE GERMS.
897. The final step in cleaning and sanitizing a prep table is rinsing the surface.
- (A) True
 - (B) False
898. A basic range includes _____.
- (A) broiler and oven
 - (B) cooktop, broiler, and toaster pan.
 - (C) cooktop, broiler, and oven.
 - (D) cooktop and oven.
899. Classically a sauce Tomat was thickened using a roux, identify the thickening agent modern cooks may use.
- (A) unfiltered stock
 - (B) emulsification
 - (C) reduction or puree
 - (D) potato starch

Cook

900. Which cooking method requires longer cooking times and often used with large cuts of meat or poultry?
- (A) pan - frying (B) poaching
(C) Roasting (D) Frilling
901. TOURIST WHO VISITS PLACES IN ORDER TO ENJOY THEIR NATURAL BEAUTY ARE WHAT KIND OF TOURISTS?
- (A) RECREATIONAL (B) ENVIROMENTAL
(C) HISTORIC (D) CULTURAL
902. Should you use hot-holding equipment to reheat food?
- (A) No (B) Yes
903. A food handler notices cleaning liquid has just been sprayed on the prep table next to some fresh vegetables. This may cause which type of hazard?
- (A) Environmental (B) Biological
(C) Chemical (D) Physical
904. Using a spoon, beater, or mixer, combining ingredients until soft and creamy.
- (A) Stir (B) Mix
(C) Blend (D) Cream
905. When setting up a ladder against a wall, which rung is safest to step on before danger ensues?
- (A) 2nd from top (B) 4th from bottom
(C) 1st from top (D) 3rd from top
906. Identify the role of the Boulanger.
- (A) vegetable chef (B) baker
(C) fish cook (D) soup cook

Cook

907. When using the FIFO method correctly, the food stored in the front should be the food that

- (A) Will expire first
- (B) Was received last
- (C) Was received first
- (D) Will expire last

908. Immediately run cold water over a cut.

- (A) False
- (B) True

909. Cacao beans are the source of chocolate.

- (A) False
- (B) True

910. To place small particles of a solid, such as butter, on the surface of a food.

- (A) saute
- (B) dot
- (C) barbecue
- (D) simmer

911. Which statement best describes a vegetable peeler?

- (A) saw-toothed blade
- (B) blade swivels
- (C) smallest knife in the kitchen
- (D) triangular blade

912. What is the biggest food safety risk when a food handler wears dirty clothes to work?

- (A) Dirty clothes might carry pathogens
- (B) The food handler might smell
- (C) Other employees might make fun of the food handler
- (D) Customers might be offended

913. Used to zest citrus fruits, such as orange or lemon, to add flavoring to baked goods.

- (A) grater
- (B) paring knife
- (C) peeler
- (D) kitchen shears

914. What is a sprouted grain?

- (A) a grain plant of a certain height
- (B) rancid grain
- (C) grain that bursts open when boiling
- (D) unprocessed grains made from germinating grain, often eaten raw

Cook

915. Tropical plant with an edible root, but is poisonous when raw.
- (A) Carrot (B) Cassava
916. The purpose of a food safety management system is to
- (A) Identify, tag , and repair faulty equipment within the operation (B) Identify, document, and use the correct methods for receiving food
- (C) Keep all areas of the facility clean and pest free (D) Identify and control possible hazards
917. A prep cook has been prepping raw chicken and wants to prep salads. Should he change gloves?
- (A) No (B) Yes
918. What is the most immediate way to gather customer feedback?
- (A) Mailing surveys (B) Distributing comment cards
- (C) Talking to diners (D) Holding focus groups
919. When rivals restaurants share similar menus and food quality, a competitive advantage can most easily be gained through?
- (A) Underselling other operations (B) Improving customer service
- (C) Creating a unique menu (D) Moving to better location
920. The MOST common cause of food contamination is
- (A) a dented can. (B) contaminated cutting boards.
- (C) poor refrigeration. (D) poor personal hygiene.
921. Food customs
- (A) are not affected by one's social status (B) are always nutritious
- (C) may be based on religion or nationality (D) are easily changed
922. You should dredge with flour, cornmeal, or bread crumbs.
- (A) True (B) False

Cook

923. Which menu item is a Big 8 food?

- (A) eggs
- (B) rice
- (C) beef
- (D) applesauce

924. Metal cannot be used in the microwave.

- (A) False
- (B) True

925. A CSA standard would be most similar to which of the following

- (A) regulations
- (B) guidelines
- (C) acts
- (D) enforcements

926. How long will frozen food keep well if the freezer maintains an ideal constant temperature?

- (A) up to six months
- (B) up to two years
- (C) up to two months
- (D) up to one year

927. Why is it important not to place the crockpot's hot ceramic insert directly on a cold counter?

- (A) inserts should be removed when food has cooled
- (B) it can crack if exposed to abrupt temperature changes
- (C) cold counters will abruptly cool down the food
- (D) the insert is too hot to handle

928. Rome and Granny Smith are types of

- (A) Oranges
- (B) Pears
- (C) Bananas
- (D) Apples

929. What mixing method would you use to make a sponge?

- (A) Blending.
- (B) Folding.
- (C) Stirring.
- (D) Whisking.

930. This white powder that comes from corn is used to thicken liquids.

- (A) Pudding
- (B) Collagen
- (C) Roux
- (D) Cornstarch

Cook

931. Surfaces that touch food must be
- (A) Rinsed and sanitized (B) Cleaned and sanitized
(C) Rinsed only (D) Cleaned only
932. The number of serving a recipe makes is called the?
- (A) Dividend (B) Portion
(C) Yield (D) Quantity
933. A tip is money given to a service employee for good work.
- (A) False (B) True
934. Color coding is used in the shop to alery people of dangers and hazards
- (A) True (B) False
935. On the way to a service call, Alan notices his friend and coworker Tom is driving the company truck while drowsy from cold medication. What duty does he have under OH&S legislation?
- (A) Get him to take a break and have a coffee (B) None, unless there is an accident
(C) Try to get him to switch seats so Alan can drive (D) Tell their supervisor about what he observed
936. to cut into very small cubes
- (A) cube (B) mix
(C) mince (D) dice
937. What condition is necessary for obtaining a browned chicken breast?
- (A) low moisture, low heat (B) high moisture, high heat
(C) high heat, low moisture (D) low heat, high moisture
938. Meats are an excellent source of carbohydrates.
- (A) False (B) True

Cook

939. Viruses are dangerous because they readily reproduce by themselves outside of living cells.
- (A) True (B) False
940. Which of the following is a sign of poor quality when selecting ingredients?
- (A) Unusual clumping or moisture in flour (B) Products selected on a first-in, first-out basis.
- (C) Re-usable by-products that have been stored for later use. (D) Fruits that have a distinct aroma.
941. After the stock has been stored, it must be degreased before it can be used. This is because?
- (A) Degreasing makes the stock clearer and purer, while removing some of the fat (B) It is easier to heat up degreased stock
- (C) All of the fat must be skimmed off in order for the stock to be healthful (D) The grease will ruin the flavor of the stock, turning it rancid
942. To cut away the skin or a very thin layer of the outside of fruits or vegetables. Use a vegetable peeler or knife.
- (A) Trim (B) Score
- (C) Scrape (D) Pare
943. What should be used to scoop ice from an ice bin?
- (A) Ice scoop (B) Bare hands
- (C) A pitcher (D) A glass
944. When transporting food items off-site, the label should include the name of the food, use-by date and time, and
- (A) Time and temperature logs (B) Invoice and receipt
- (C) Reheating and service instructions (D) Driving and delivery instructions

Cook

945. Which leavening agent requires an acid in order for it to work?
- (A) baking powder (B) baking soda
(C) yeast (D) steam
946. Diurnal shift is the temperature range between
- (A) day time highs and night time lows. (B) sunrise and sunset.
(C) day time lows and night time highs. (D) the average temperature during a 24-hr period.
947. A sautoir is a pan with?
- (A) Straight sides and a long handle (B) High, sloped sides and no handle
(C) A wide , shallow bottom and a long term handle (D) The shape of a stockpot, but no handles
948. Identify the term that describes the amount of space an ingredient takes up.
- (A) volume (B) measurement
(C) mass (D) weight
949. Overheated fat or oil can burst into flames.
- (A) True (B) False
950. What are three of the Big Eight food allergens?
- (A) Coffee, raspberries, corn (B) Eggs, wheat, fish
(C) Onions, broccoli, potatoes (D) Olives, mushrooms, lettuce
951. A small pot on a large burner is a safe practice.
- (A) False (B) True
952. What is the best way to put out a grease fire?
- (A) pour water on it (B) put a dishtowel over it
(C) smother it with the lid or baking soda, flour, or some type of powder substance (D) pick up the pot, throw it in a sink and run water on it

Cook

953. Cakes made with fat are called butter cakes, identify the name of the cake made without fat.
- (A) creamed (B) cupcake
(C) sponge (D) Lamington
954. When partial cooking food to be finished later, what is the maximum cooking time allowed during initial cooking?
- (A) 45 minutes (B) 60 minutes
(C) 30 minutes (D) 15 minutes
955. Refined carbohydrates such as white bread are a recommended source of good carbohydrates.
- (A) False (B) True
956. What is a mixture of egg yolks and heavy cream that adds a rich flavor and velvety smoothness to the sauce without making it too thick?
- (A) Slurry (B) Liaison
(C) Compound butter (D) Hollandaise
957. The essential part of stock that is a mixture of coarsely chopped onions, carrots, and celery is?
- (A) Sachet d'épices (B) Bouquet garni
(C) Mirepoix (D) Aromatics
958. Egg yolks range in color from pale yellow to almost orange, this is due to
- (A) the hen being free range. (B) the hen's diet.
(C) color injections during processing. (D) the hen's age.
959. Identify how a food tolerance is different from a food allergy.
- (A) causes low blood pressure (B) involves the immune system
(C) is not life threatening (D) does not impact the digestive system

Cook

960. This type of chicken is typically six to eight weeks old, with tender and relatively lean meat. It weighs up to four pounds and has versatility with cooking methods.

- (A) Cornish game hen
- (B) goose
- (C) fryer
- (D) pigeon

961. Why is it important to cut food into uniformly sized pieces?

- (A) distribution of flavor
- (B) even cooking
- (C) easier to stir
- (D) aesthetic appeal

962. If chocolate chips have 20 calories in 1 tbsp, how many calories are in 1 cup?

- (A) 240
- (B) 160
- (C) 460
- (D) 320

963. Why is it important to use cold butter and water when using the rubbing-in method to prepare pastry?

- (A) It's fresher and less likely to contain harmful bacteria.
- (B) Increase the cooking time and temperature.
- (C) It restricts the development of gluten so you get a crisper pastry when you cook it.
- (D) It prevents the pastry proving too quickly.

964. Veloute is a mixture of roux and _____.

- (A) brown stock
- (B) white stock
- (C) dairy
- (D) tomatoes

965. Measure 1/2 cup maple syrup with a:

- (A) dry measuring cup
- (B) liquid measuring cup
- (C) measuring spoon

966. What is the most effective way to rate employee performance?

- (A) Group evaluation meetings
- (B) Question and answer
- (C) Performance appraisal
- (D) Employee feedback

Cook

967. When checking to see whether a guest is of legal age to drink alcohol, a ___ is an acceptable form of identification?
- (A) Birth certificate (B) College id
(C) Passport (D) Credit card with signature
968. Along with pinto beans, these beans are a staple in Mexican cooking.
- (A) lentil beans (B) green beans
(C) black beans (D) kidney beans
969. Identify the main function of an acidic ingredient in a marinade.
- (A) reduces cooking time (B) softens foods for flavor absorption
(C) firms the skin for flavor absorption (D) adds nutrition to the dish
970. Where is the best place to cool cakes, pastries and breads to retain optimum freshness and product characteristics?
- (A) Place them on a wire rack on the bench. (B) Leave them in their baking trays or tins and place them on the bench.
(C) Leave them in their baking trays or tins and place them in the fridge. (D) Place them on a wire rack in the fridge.
971. Food customs mean one's ..
- (A) food nutrients (B) food habits
(C) food requirements (D) all
972. When scaling a recipe down from twelve servings to six servings, what will be the new measure for the original 1/2 cup (125 ml) cocoa?
- (A) 1/3 cup (80 ml) (B) 1/4 cup (60 ml)
(C) 3 Tbsp (45 ml) (D) 1 cup (250 ml)
973. What is the most serious degree of burn?
- (A) Fourth (B) Second
(C) Third (D) First

Cook

974. Identify the type of meat cut ideal for cooking in a crockpot.
- (A) chicken breasts
 - (B) pork tenderloin
 - (C) filet mignon
 - (D) fatty tougher meats
975. How long can food stay in the temperature danger zone before you should throw it away?
- (A) Four hours
 - (B) One hour
 - (C) Two hours
 - (D) Three hours
976. Pasteurize
- (A) To simmer slowly for a long time
 - (B) To kill bacteria by heating, generally applied to milk or fruit juice
 - (C) To cook in liquid at boiling temperature
977. Which of the following are ways in which restaurants can be harmed if they do not follow good safety and sanitation practices:
- (A) Increased insurance premiums.
 - (B) Lowered employee morale.
 - (C) embarrassment
 - (D) all
978. Fruits that are cooked in simmering water are
- (A) Sautéed
 - (B) Broiled
 - (C) Poached
 - (D) Roasted
979. An alternative name for wheat is soft wheat.
- (A) True
 - (B) False
980. Which action could cause cross-contamination in a self-service area?
- (A) Customers returning to the food bar with their original plates
 - (B) Customers using ice from the ice machine in their drinks
 - (C) Food handlers putting clean utensils on the self-service line
 - (D) Food handlers labeling all cold salads and sauces

Cook

981. What should a food handler do if a customer is experiencing an allergic reaction?
- (A) Wait and see if the condition goes away on its own (B) Perform the heimlich maneuver
- (C) Do not get involved due to lawsuit potential (D) Call the emergency number for assistance
982. to cut in a liquid until partly cooked
- (A) roll (B) parboil
- (C) boil (D) cool
983. What is the primary reason for slicing and/or pounding chicken breasts to even out the thickness?
- (A) To tenderize the meat (B) To promote even cooking
- (C) For presentation
984. You're making 104 servings of apple pie. Your recipe yields one pie of eight portions and each pie requires 250 g sweet pastry. How much pastry do you need to make?
- (A) 3.25 kg. (B) 3.125 kg.
- (C) 4 kg. (D) 3 kg.
985. How many measures of $\frac{3}{4}$ cups are needed to fill $1\frac{1}{2}$ cups?
- (A) 3 and $\frac{1}{4}$ cup (B) 2
- (C) 4 (D) 3
986. What does it mean to use reduction as a thickening method when making a sauce?
- (A) to intensify the flavor of a liquid by simmering or boiling (B) to use dried herbs in place of fresh herbs
- (C) to scale back the liquid in a recipe (D) to cool a liquid before adding a thickener

Cook

987. According to the Canada Food Guide, how many dice represents one serving of hard cheese?
- (A) 5 (B) 1
(C) 28 divided by 7 (D) 3
988. The process that an operation uses to integrate new employees into an organization is called?
- (A) Training (B) On boarding
(C) Training (D) Orientation
989. What's the best way to cool containers of chili?
- (A) On a prep table (B) In an ice-water bath
(C) In the cooler
990. This fat, introduced by the Spanish, is the most popular type of fat used in Mexican cooking.
- (A) coconut oil (B) margarine
(C) avocado oil (D) lard
991. When working with food you only need to wash your hands before you begin handling the food items.
- (A) False (B) True
992. A SAFETY INSPECTION OF AN OPERATIONS FACILITY, EQUIPMENT, EMPLOYEE PRACTICES, AND MANGEMENT PRACTICES IS CALLED?
- (A) ACCIDENT INVESTIGATION (B) GENERAL SAFETY
(C) EMERGENCY PLAN (D) MATERIAL SAFETY PLAN
993. To make thin, straight cuts through the outer edge of fat on meat to prevent the meat from curling during cooking.
- (A) Score (B) Trim
(C) Pare (D) Julienne

Cook

994. Oven-frying is sometimes called baking.
- (A) False (B) True
995. For the best results, how full should you fill a crockpot?
- (A) leave 1 inch/2.5 cm of space from the top (B) between one half and two thirds full
- (C) no more than one half full (D) three thirds full
996. Parasites are commonly associated with
- (A) potatoes (B) ready-to-eat food
- (C) eggs (D) seafood
997. To cook food over a boiling liquid in a covered cooking container.
- (A) scald (B) sear
- (C) steam
998. to spoon pan drippings, water, or sauce over a food while roasting it
- (A) baste (B) toast
- (C) stew (D) grate
999. Which food group builds strong muscles?
- (A) meat and legumes (B) vegetables
- (C) grains (D) fruit
1000. At what temperature should you prove dough?
- (A) 20 to 37 °C. (B) 80 to 90 °C.
- (C) 10 to 22 °C. (D) 30 to 45 °C.

Cook

1001. An operation ensures that the exterior of the facility is spotless and well-kept, and the staff frequently rehearses the restaurants greeting script. What is the most likely outcome of this operations effort?
- (A) Table service will become slower but more through (B) Profits will decrease because of costs to maintain the exterior of facility
- (C) Staff turnover will increased due to script requirements (D) Customers will have a positive first impression of the operation
1002. An appliance should not be placed in water unless it is labeled _____.
- (A) with an American seal of approval (B) with an UL symbol.
- (C) "immersible" (D) made in America tag.
1003. Secondary flavors in wine are primarily the result of
- (A) bad winemaking. (B) bottle aging.
- (C) the addition of flavoring. (D) fermentation and oak aging.
1004. Double the following ingredient: 1/4 cup flour.
- (A) 1/2 tsp flour (B) 1/8 cup flour
- (C) 1 cup flour (D) 1/2 cup flour
1005. What liquid is usually used for making stock?
- (A) Beef broth (B) Boullion
- (C) Water (D) Chicken broth
1006. Identify the first step when using the cake method to make a butter cake.
- (A) cream the shortening and sugar together (B) add all ingredients together by gently folding mixture
- (C) cut the shortening into the dry ingredients (D) separately add liquid ingredients and dry ingredients together, then combine
1007. The number of serving a recipe makes is called the?
- (A) Portion (B) Quantity
- (C) Dividend (D) Yield

Cook

1008. to spread the surface of face of food with butter, oil, egg, etc. using a pastry brush

- (A) cube
- (B) brush
- (C) braise
- (D) bread

1009. What does the term "imperfect food" mean?

- (A) food that doesn't fit a store's cosmetic standards
- (B) food in damaged packaging
- (C) food with slightly lower nutrient value
- (D) previously frozen food

1010. Baking soda applied to a grease fire will cause the fire to spread.

- (A) True
- (B) False

1011. Which piece of equipment would you use to fill profiteroles?

- (A) Piping bag and nozzle.
- (B) Fluted wheel.
- (C) Palette knife.
- (D) Rubber spatula.

1012. Biotechnology is using synthetic processes in the manufacturing of new foods.

- (A) False
- (B) True

1013. You have some fresh strawberries left over after making a cheesecake. What should you do with them to minimise waste and maximise profitability?

- (A) Store them at 6 to 10 °C so you can use them later for something else.
- (B) Eat them at your break time.
- (C) Garnish the cheesecake with them, even though this isn't on the standard recipe.
- (D) Dispose of them in the compost or other appropriate waste bin.

1014. What is the first thing an employee should do when a customer has a severe allergic reaction?

- (A) ask the guest for emergency contact information
